1 Accounting policies

Going concern

The directors have considered a period of at least twelve months from the date on which these financial statements have been signed and, having considered all relevant information available to them, believe it is appropriate to prepare the financial statements on a going concern basis.

Basis of accounting

The financial statements are prepared on the historical cost basis of accounting and have been prepared in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The financial statements do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirements to prepare such a statement under the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents the value of services supplied by the company, excluding value added tax.

Depreciation of tangible fixed assets

Depreciation is provided on all tangible fixed assets at rates calculated to write off the full cost less estimated residual value of each asset over its estimated useful life. The principal rates in use are:

Boats	10%	reducing balance
Boat improvements	10%	reducing balance
Motor vehicles	25%	on cost
Computer equipment	33%	on cost

Deferred taxation

Deferred tax is provided in respect of the tax effect of all timing differences that have originated but not reversed at the balance sheet date.

A deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on a nondiscounted basis, at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Foreign currency translation

Assets and liabilities denominated in foreign currencies are translated into sterling at the rates ruling at the year end. Transactions occurring during the year are translated at the exchange rate effective at the date of the transaction.

Any gains or losses arising on exchange are dealt with in the profit and loss account.
