

# Embli NetIQ

Confidence in Every Connection

Embli NetIQ is a modern, AI-driven network platform that gives multi-site businesses confidence in every connection. It delivers clear visibility, stronger security and simplified management - without the cost, complexity, or rigidity of traditional networking setups.

Delivered and fully managed by Embli, NetIQ ensures your network is reliable, secure and always under control, letting IT teams focus on the business, not firefighting.

## Key Benefits

- ✓ **See more, fix faster** – AI-driven insight detects and resolves issues automatically before users notice.
- ✓ **Predictable costs** – flexible licensing and no expensive renewals or vendor lock-ins.
- ✓ **Simplify management** – one intuitive dashboard for all sites, policies and users.
- ✓ **Easy adoption** – integrates seamlessly with existing infrastructure, letting you scale and improve your network without disruption.
- ✓ **Built-in security** – network and security managed together, reducing risk and admin overhead.
- ✓ **Proactive support** – delivered and managed by Embli’s experienced team for peace of mind.

## Use Cases

Business Type	How NetIQ Helps
Professional Services	Connects multiple offices securely and reliably under one pane of glass.
Retail & Hospitality	Keeps distributed sites online with strong Wi-Fi and performance visibility.
Manufacturing & Logistics	Monitors and maintains uptime across warehouses and production sites.
Healthcare & Education	Delivers secure, compliant connectivity for staff, students or patients.
IT & Managed Services	Simplifies complex environments and reduces time spent on network admin.

## Embli NetIQ vs. Others

Embli NetIQ	Legacy / Cisco-Type Networks
✓ Unified visibility and control across sites	Fragmented dashboards, limited insight
✓ AI-driven optimisation and automation	Manual configuration, slow response times
✓ Predictable, transparent pricing	Complex, licence-heavy models
✓ Works with existing systems	Often requires full hardware refresh
✓ Managed and supported by Embli	Vendor-led support queues and delays

## Who's Embli NetIQ For?

- ✓ Mid-market businesses with **100-1000 employees**
- ✓ Organisations operating across **multiple sites or branches**
- ✓ Companies **currently using Cisco, Meraki or similar** looking for simpler, more cost-effective options
- ✓ IT teams that want **more visibility, control and flexibility** without expanding headcount

## Getting Started – Proof of Concept

### We recommend starting small.

Choose one or two representative sites for a **Proof of Concept (POC)** to show how **Embli NetIQ** can:

- ✓ Improve performance and visibility within weeks
- ✓ Simplify management for your IT team
- ✓ Reduce support and licensing costs

The POC gives you a clear view of the benefits before wider rollout – with support, configuration and monitoring handled by **Embli** from day one.
