About Greenpoint Technologies

Greenpoint Technologies provides custom aircraft interiors and MRO services for private clients, governments, and heads of state. Recognized by Boeing as one of the original Business Jet Completion Centers, Greenpoint delivers turnkey completions defined by quality, commitment, craftsmanship, and an exceptional client experience.

Greenpoint's strength lies in designing, engineering, and manufacturing novel interior solutions tailored to client needs. The innovative BBJ 787-9 AeroSuite provides a private sanctuary for passengers to rest, work, or dine while in flight – seamlessly blending privacy, comfort, and innovation.

KEY FEATURES

- Privacy walls for enhanced discretion.
- Dedicated lie-flat bed for restful comfort.
- Separate reclining seat with a storage ottoman.
- Tracking tray table for both seated and sleeping positions.
- 32" oversized monitor for entertainment and productivity.
- 75" tall closet providing ample storage space.

The AeroSuite is customizable with quality VVIP finishes, adjustable accent lighting, and tailored In-Flight Entertainment (IFE) options. Designed for those who value comfort and privacy, the AeroSuite elevates the in-flight experience by offering a personalized, sophisticated retreat tailored to the discerning traveler.
