

HORIZON PPM – the first voice enabled Project Portfolio Management smart assistant.

HORIZON PPM is the first Project Portfolio Management service integrated with the Amazon Alexa voice service. These voice capabilities extend the existing fully web responsive service from desktop, tablet and mobile to now also being available from the Amazon Echo range of voice assistants.

AVAILABLE COMMANDS:

Start with "Alexa open Horizon PPM" then use the following commands...

Portfolio Status

- "What's on the horizon?" - Provides an overview of the projects by RAG status along with a count of escalations, actions and items on the RAID log.
- "Give me a portfolio overview" - Provides a status summary of all currently active projects.
- "How many projects are there?" - Provides a count of all currently open projects
- "List all projects" - Lists all current open projects and their owners

Escalations

- "How many escalations are there?" - Provides a count of all currently open escalations
- "List all escalations" - Lists all current open escalations and their owners

Actions

- "How many open actions are there?" - Provides a count of currently open actions.
- "List all actions" - Lists all open actions and their owners

RAID items ^{*1}

^{*1} RAID = Risks, Assumptions, Issues & Dependencies

- "How many raid items are there?" - Provides a count of all currently open RAID items
- "List all raid items" - Lists all current open items on the RAID log and their owners
