Questions

Marc Jourdan
IEMA Policy & Engagement Lead
m.jourdan@iema.net

iema.net

Background

- Infrastructure underpins the fabric of society. It must be fit for the future if we are to make the transition to a sustainable future.
- From heightened supply chains risks to extensive environmental implications, and the development of a resilient and adaptive network, there are numerous drivers for making this transition within road infrastructure projects.

Session focus

- Overview of the opportunities and challenges in adopting a circular approach to road infrastructure projects;
- Concrete examples of successful projects;
- Recommendations on how to make this transition, including the design of CE route maps.
