Questions

Marc Jourdan
IEMA Policy & Engagement Lead
m.jourdan@iema.net

iema.net

Background

- Measuring social value can be harder than measuring economic value or environmental value. As a form of data, social value is less tangible, more subjective, and harder to interpret.
- During this session we will explore options to measure social value correctly and better understand the interface between environmental measurement and social value.

Session focus

- An overview of the key tools and approaches for measuring and reporting on social value;
- Insight on the interconnection between the measurement of environmental and social value;
- Practical industry examples and lessons learnt.
