Members

How we support our members

- ❖ Net Zero
- ❖ Energy efficiency
- ❖ Renewables
- ❖ Transport
- ❖ Procurement
- ❖ Water
- ❖ Waste
- ❖ Biodiversity
- ❖ Land management
- ❖ Climate change adaptation
- ❖ Monitoring and reporting
- ❖ Strategy development
- ❖ Making the business case
- ❖ Behaviour change....
- ❖ Network with like-minded people
- ❖ One to one advice
- ❖ Learn lessons from similar projects
- ❖ Download resources and templates used by peers
- ❖ 'Under the bonnet' site visits
- ❖ Collaborate on solutions
- ❖ Get out of the office!
- ❖ Feel inspired and supported
- ❖ Raise the profile of your work

And much much more....

Upcoming events

24th March – An introduction to Sustainable Procurement

22nd April – Net Zero focus group plus site tour

23rd April – Sustainable Land Use at Wimpole Home Farm

13th May – Sustainable Procurement #2: Supply Chains

16th June – Behaviour Change conference

Visit www.fftf.org.uk for full details and to register

Resources and online area

Tamara Hunt
Sustainability Officer

I manage and implement the Sustainability Strategy across the 7 University sites to embed sustainability into our campuses, community, curriculum and cultures.

Experience

- Sustainability education
- Energy dashboards/ data analytics
- Behaviour change programme
- Behaviour change programme (Energy)
- Sustainable procurement
- Energy Efficiency

Biodiversity: It's role in sustainability and tackling climate change - Charlie Bell Presentation

Sustainability West Midlands and Fit for the Future Network partnered together on an event to explore the importance of biodiversity in sustainability and tackling climate change. We shared case studies of practical projects, introduced the 25 Year Environment Plan and had a wonderful tour of the Field Studies Council's successful biodiversity schemes.

COVER THEME ENVIRONMENTAL SUSTAINABILITY

THE HEAT IS ON

The changing climate is already having an impact on organisations' buildings and operations. Here, four members of the Fit for the Future network reveal what they are doing to build charities' resilience for the future.

News and Ideas

From 35,000 litres of oil a year to Renewable Heat at National Trust's Wimpole Estate

12 March 2019

It previously took 35,000 litres of oil a year to heat the Grade 1 listed mansion house and restaurant at National Trust's Wimpole Estate, but newly installed renewable heat pump technology has taken this figure down to 0. The heat pump uses around one third of the energy needed by the previous oil boilers, and has reduced carbon emissions by 47 tonnes per year as well as saving over £8,000 a year in fuel costs. Fit for the Future practitioners from Guide Dogs, RSPB, Historic England, English Heritage, Diocese of Ely and National Trust headed to Wimpole to find out about the installation and related successes and challenges first hand.

Case Studies

Fit for the Future's 100+ member organisations have undertaken a broad range of environmental sustainability projects to become more climate-friendly, adaptive and resilient. Our case studies introduce some of these projects and the associated outcomes.

Field Studies Council

Commitment to the environment is at the heart of the Field Studies Council, an environmental education charity with 19 permanent bases across England, Scotland, Wales and Northern Ireland.
