

Real-time ESG Tracker

ESG data can be backward-looking. That is why we supplement our fundamental analysis of company ESG data, with a real-time ESG sentiment analysis.

Our AI model analyzes over 47,000 news and social media sources, to alert you when sentiment around a company's ESG performance is shifting.

Our model operates in real time, continuously monitoring every public and private company in our database. It aims to alert you by email to a building story, before it blows into an ESG controversy.

Want to drill into the underlying ESG issues? Just click on the line chart, and we show you the stories, comments and tweets that are driving the change in sentiment.
