

Data Scientist (Customer Facing)

As a Customer Facing Data Scientists you will be expected to work with the Field Sales team members and lead Junior Sales Engineers in developing opportunities, analyzing customer requirements, and providing consultative selling skills in complex technical environments. You will be comfortable leading technical demonstrations of Datarobot. You will work with prospects and clients to extract and transform representative datasets for use in technical demonstrations. You will be responsible for architecting solutions to complex predictive analytics problems involving many diverse input data sources and high volume real time implementation scenarios.

Skills:

- 2+ years of real world business experience
- Hands on real world experience in predictive modeling
- Strong customer interaction skills
- Must possess excellent organizational, communication, writing and interpersonal skills
- Familiar with a variety of technical tools for the manipulation of datasets
- Fluency with SQL on one or more of the following databases - Oracle, SQL Server, MySQL, Postgres
- Fluency with scripting (Python, Javascript, Bash)
- Experience with cloud computing platforms
- Experience with Hadoop and related Big Data technologies
- Experience with predictive analytics
- Experience working in an agile sales environment
- Experience with NoSQL databases
