

## Consultant Developer

### Who we are

Intellection are the creators of the Intellection Reporting Platform – Insight Out – a cutting-edge tool for the market research industry.

We focus on full-stack automation, saving time and adding value in data processing, data analysis, information visualization and reporting. Our extensive testing framework ensures data integrity, while our designers have focused on creating an intuitive and beautiful user experience. Our product is used across the globe by large multinationals.

We are expanding in several areas and are looking at new creating new products for the international market.

### Who we're looking for

**We are looking for people with a passion and talent for client engagement** who want to grow in fast paced and dynamic start up enterprise.

The ideal candidate will have a few years of strong work experience, having shown himself or herself to be highly competent. They should be passionate about developing and delivering high quality products for our clients and take pride in their work.

Experience with Agile programming, Ruby, Javascript and JQuery is advantageous.

The individual will be a team player with good communication skills who is self-motivated and driven to excellence. They will have strong analytical and problem solving skills, and a creative and flexible attitude.

### The Job

You'll be working on anything from interacting with clients to define requirements and come up with creative solutions, to customised data mining algorithms on server side. The job includes extending our rapidly evolving analysis platform as well as creating new products. You will be delivering client material (data transformations and visualisations) using Ruby, HTML and Javascript.

It's a fast paced, agile environment focused on software delivery. And we operate as close to the bleeding edge as possible to leverage other open source projects to develop a platform that is shaking up an industry. The individual will be based in either be the London, Amsterdam or Cape Town office, and there is some flexibility in terms of ongoing physical location. The individual must be legally able to work in the proposed location.
