

Back End Developer

London, United Kingdom · DEV

DESCRIPTION

Thought Machine is working on revolutionary technology to bring Machine Learning and Big Data to the world of personal finance, and to do so in a way that provides a beautiful intuitive user experience.

Formed in May 2014 by serial entrepreneur Paul Taylor, we have quickly grown to a team of 25 and expect to expand to 50 people by the end of 2015. Our team is first rate, with an eclectic mix of backgrounds from Google to some of London's top design agencies.

We have already signed some of the leading names in the finance industry as customers and expect to launch later in 2015. We are a passionate bunch with an incredibly skilled team, searching for like-minded people to join in the adventure.

We are searching for a Back End Developer to join our growing team.

REQUIREMENTS

Our new team mate will have:

- Significant experience in either Python or Java, and expert in one of them.
- Experience of AWS
