

Client Informatics

Winton Capital Management is a highly successful global investment management firm, specialising in the application of advanced mathematical and computing techniques in the management of international investment portfolios. Winton currently advises more than \$30bn of such assets.

The Client Informatics team within the Investment Solutions division is seeking to recruit an Associate to inherit and enhance existing technologies and build strategic solutions to facilitate expansion of the business.

Responsibilities

- Production of regular updates and reports on performance, strategies and risk metrics.
- Addressing client queries and production of timely, high quality and relevant information.
- Conduct market research and internal analytics to inform product development and business strategy.
- Develop customised documents and presentations to answer key client specific requests with the help of the research team where appropriate.
- Work with Business Technology and key stakeholders to develop and integrate the latest technologies within Investment Solutions.
- Act as contact within Investment Solutions for all quantitative data associated with our products.
- Advanced use of CRM.

Requirements

- Minimum 2:1 degree from a top tier university.
- Strong communication skills.
- Organisation skills, attention to detail and meeting deadlines.
- A high level of proficiency in Microsoft Office is essential.
- Technical experience in SQL, VBA and Python would be beneficial.
- Experience in financial markets is preferable.
- Understanding of risk management techniques, derivatives instruments and quantitative methods.
