

PARTNER WITH US

Introducing Kubrick

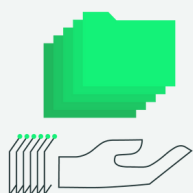

North America

What we do

Kubrick exists to solve the global digital skills emergency, which is holding back organizations from harnessing the power of data, AI, and cloud technology to stay relevant, compete, and win.

As an integral partner in transforming businesses throughout the UK, we are expanding our services to address the skills divide growing across North America, from New York to Texas.

We seek out and develop smart, ambitious individuals from all backgrounds to bring a fresh approach to data, AI, and cloud technology challenges. We build our own workforce with the skills which organizations need to transform, solving today's most pressing capacity challenges while futureproofing capability with long-term team augmentation.

Bridge the skills gap

We cultivate expertise in the most sought-after areas of data, AI, and cloud technologies.

Futureproof capabilities

Traditional consultants walk skills offsite; Kubrick clients can retain their skill and IP.

Flexible and cost-effective

Engage our award-winning consultants for short-term projects or long-term staff augmentation at a fraction of the cost of traditional consultancies.

Increase diversity

We improve the gender, racial, religious and cultural balances in teams, enhancing diversity of thought.

How it works

01 Select

We partner with universities across the US to find the brightest minds from all backgrounds and use our unique assessment process to select the top 1% of applicants to train with us.

We are building a workforce across the US which has the skills your business needs to evolve and transform.

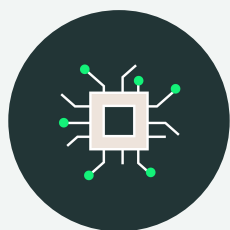

02 Train

We transform our consultants into data, AI, and cloud professionals through 4+ months of intensive training delivered by our team of industry experts.

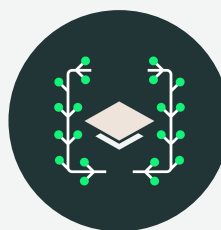

04 Support

We provide dedicated professional and personal guidance for the entirety of our consultants' time on site.

03 Engage

We match our consultants' capabilities with our clients' needs, optimizing delivery of projects on client engagements.

05 Transition

After 2 years, clients can offer permanent roles to our consultants at no additional cost to build their own teams.

Blended Squads with Kubrick Advanced

Harness our senior inhouse consultants to manage your consultants on site and solve today's most pressing challenges while futureproofing capability for tomorrow.

Kubrick Advanced Squad Leaders utilize their industry experience to lead our junior consultants for your project delivery, giving you:

Reduced pressure on management bandwidth with a single point of contact and routine updates on progress to stakeholders.

An expedited process to onboard new consultants into teams to enable them to deliver results faster.

Ability to draw on consultants trained across all our practice areas in data, AI, and cloud.

Optional retention of squad members beyond the project for longer-term engagements, with the ability to offer a permanent role after 2 years with Kubrick.

Technical expertise and guidance for our junior consultants to drive impactful delivery at a fraction of the cost of traditional consultancies.

Building a Diverse Workforce

We are shaping the technology industry by building a workforce capable of creating immense change - a workforce which is diverse, inclusive, and accessible.

Driving Diversity

Our mission is to make Kubrick a place for everyone, regardless of gender identity, ethnicity or nationality, disability, religion, sexual orientation, socioeconomic background, or age.

Supporting Gender Balance

Kubrick is committed to bridging the gender divide. We ensure our recruitment process is gender neutral, always using inclusive language.

Lowering Socio-Economic Barriers

Our consultants are paid a full-time salary from Day 1 of training to ensure people of all backgrounds can join us and feel supported to excel in their learning.

Identifying future data and tech leaders

Our inclusive assessment process allows us to identify the potential to rapidly learn today's most important technical skills, with an appetite for lifelong learning beyond our training.

We champion transferable skills from all majors and universities to increase our diversity and create highly adaptable consultants with strong technical and critical communication skills.

"Collibra and Kubrick's partnership enables our joint customers to accelerate their journey to data intelligence by helping them build the data teams and competencies necessary to quickly access the value that lies within data. By working with Kubrick, clients are able to achieve tangible results more quickly so that they can become fully data literate and make insightful decisions based on data they can find, trust, and understand."

Joseph Lopez, Director of Partner Alliances at Collibra
