

CSKILLS CERTIFICATE
LEVEL 1 IN JOINERY

CSKILLS DIPLOMA LEVEL 1
IN JOINERY

CSKILLS DIPLOMA LEVEL 2
IN JOINERY

Entry requirements

All candidates will be invited to attend a pre-course interview at one of our Academies.

You will work on a variety of projects, where you will learn how to produce different timber joints and cuts, make frames, hang doors and produce stud work. You will also be trained in the safe use of power tools.

The course will teach you how to measure up fittings, identify what quantities of materials you will need for the job, and ensure you can create work that is straight and level.

You will learn the manual skills of a joiner and have opportunities to be creative, to work from architects' drawings and kitchen fitting designs, and even create your own designs.

In addition to practical activity, you will acquire knowledge during theory sessions relating to your chosen craft. You will also be given the opportunity to improve your maths and English skills with our high-quality functional instruction.

We can even help you prepare for the world of work through relevant employability support and work experience.
