GCSE ENGLISH

GCSE MATHS

We can help to improve your core maths and English skills by enhancing your knowledge, understanding and application of these essential skills.

Sometimes our numeracy and literacy skills hold us back in general day-to-day tasks and, even worse, from getting a job. That's why, when you complete a course at one of our Academies, we are also able to help you improve your English and maths. This is not like being at school; we will get you through your qualifications and on the path to success.

**Skills gained include:**

- Writing
- Reading
- Speaking and listening
- Working with fractions, decimals and percentages
- Measurements
- Statistics, basic algebra and geometry
