

Abstract Sculpture One Black

This black lingbi stone on a stand is a natural Gongshi, or “scholar’s stone,” treasured in Chinese culture for its unique beauty and artistic form. It features a smooth, polished surface and a deep black colour that highlights the stone’s natural patterns. Each piece is entirely naturally formed and has not been sculpted by hand, making every stone one-of-a-kind. Its organic shape resembles a abstract sculpture, making it a striking piece of natural art for display.
