

SOMTOCHUKWU NKEMAKOLAM

Full-Stack Developer

talktosomto@gmail.com | 08028616682 | 08148696119 | talktosomto.xyz | github.com/s0mt0 | linkedin.com/in/sewkit0
Abuja, Nigeria - Open to remote roles and willing to relocate for non-remote roles

PROFILE

Full-stack developer focused on building backend-heavy web products, reliable APIs, clean user interfaces, and practical product systems. Experienced across AI-powered tools, business platforms, CMS systems, property tech, logistics workflows, financial-style backend systems, integrations, authentication, databases, and deployment. Comfortable working independently or with a team, taking ownership of features from rough requirements to usable software, and leading small implementation efforts when needed. I also leverage AI tools in my coding process to debug faster, explore implementation options, automate repetitive engineering tasks, and move from idea to working feature more efficiently.

CORE SKILLS

Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, Shadcn UI, Zustand, Redux Toolkit, React Query, Framer Motion
Backend	Node.js, Express.js, NestJS, Python, Django, Django REST Framework, FastAPI, REST APIs, authentication, API integration
Databases & Storage	PostgreSQL, MongoDB, Redis, Prisma, Sequelize, Mongoose, AWS S3, Cloudinary
AI & Automation	OpenAI APIs, AI-powered product features, prompt workflows, AI-assisted development, debugging workflows, productivity automation
Tools & Platforms	Git, GitHub, Docker, Postman, Vercel, Stripe, Flutterwave, Paystack etc.

EXPERIENCE

Full-Stack Developer | Propertykraft Africa — June 2025 - August 2025 · Lagos, Nigeria

propertykraft.africa

- Worked on product features and WhatsApp bot integration for a property management platform, connecting customer communication flows with backend product logic.
- Built and improved frontend and backend functionality around property workflows, APIs, bot flows, testing, and product communication.

Full-Stack Developer | Deltastack Inc. — 2023 - May 2025

deltastack.io

- Worked across multiple product codebases, building frontend pages, backend APIs, product features, bug fixes, internal tools, and production improvements.
- Contributed to products including ChatXBT, CryptoFundMe, Keringit AI, and other AI-powered and web-based tools.
- Built and improved features using React, Next.js, TypeScript, Node.js, Express, databases, and third-party APIs while collaborating with other developers to ship updates.

Backend Developer | GatherPay — Contract | 2025 - January 2026

wegatherpay.com

- Worked on backend infrastructure for a group savings product serving communities across the UK and Africa, built around shared contributions and rotating savings workflows.
- Built APIs, database models, authentication-related flows, and server-side product logic with NestJS, TypeScript, PostgreSQL, Sequelize, and Redis.
- Supported backend flows for savings groups, mobile app features, real-time product needs, and financial-style user workflows.

Backend Developer | HireUs Logistics — Contract | 2024 - 2025

github.com/S0mt0/hireuslogistics

- Built backend functionality for a logistics platform, setting up REST APIs, authentication, database models, and product logic for delivery-related workflows.
- Used Express.js, TypeScript, MongoDB, Mongoose, JWT, and validation workflows to translate logistics requirements into backend features.

Full-Stack Developer | Zita-Onyeka Foundation Website and CMS — Freelance Project | March 2026 - April 2026

zitaonyekafoundation.org

- Built a public foundation website and protected admin CMS covering public pages, blogs, events, gallery content, donation flows, media, backend APIs, deployment setup, and SEO structure.
- Connected CMS-managed content to frontend pages and created admin workflows for managing site content without manual code edits.

Independent Full-Stack Developer | Personal and client-facing projects — 2022 - Present

talktosomto.xyz

- Build CMS systems, web applications, admin tools, backend APIs, integrations, publishing workflows, file uploads, comments, analytics, and newsletter flows.
- Use independent projects to improve product thinking, code structure, backend design, release habits, and AI-assisted development workflows.

SELECTED PROJECTS

Keringit AI - *AI product*

AI-powered product work involving AI-driven features, backend integrations, user-facing interfaces, prompt workflows, and practical AI-assisted product experiences.

Stack: Next.js, TypeScript, Node.js, APIs, AI integrations, prompt workflows, backend services

Links: [View project](#)

CMS Systems - *Full-stack CMS / admin tools*

Built CMS-style systems for publishing, authentication, protected admin routes, content workflows, media handling, analytics, comments, and public API-driven pages.

Stack: Next.js, TypeScript, Tailwind CSS, MongoDB, Redis, Better Auth, AWS S3, Tiptap, dnd-kit, Shadcn UI

Links: [Example CMS](#) | [GitHub example](#)

Zita-Onyeka Foundation Platform - *Public site + CMS*

Public website and admin CMS for a foundation, including content-managed pages, blogs, events, media gallery, donation flow, public APIs, protected admin tools, SEO, and deployment setup.

Stack: Next.js, TypeScript, Tailwind CSS, Tiptap, MongoDB, Prisma, dnd-kit, NextAuth, AWS S3, Shadcn UI, Paystack

Links: [Live site](#) | [Frontend repo](#) | [Admin CMS repo](#) | [Admin CMS](#)

GatherPay Backend - *Backend system*

Backend APIs and product logic for a group savings product, supporting savings groups, contribution workflows, mobile app features, and shared finance operations.

Stack: NestJS, TypeScript, PostgreSQL, Redis, Sequelize, AWS S3, Twilio, Socket.io, WebSocket

Links: [Live site](#) | [GitHub](#)

HireUs Logistics API - *Backend system*

Backend API for a logistics platform, covering authentication, REST APIs, database models, validation, and delivery-related business logic.

Stack: TypeScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Joi
