

Requirements for basic training in head, neck, maxillo-facial and dental surgery.

(Please also find a list of knowledge / skills at <https://www.rcoa.ac.uk/CCT/AnnexB>)

RCoA

- It is anticipated that learning outcomes will be gained throughout the duration of Core Level training and that these should be achievable in most general hospitals at this level.

Learning outcomes

- Gain experience of anaesthetic care of patients undergoing minor to intermediate ear, nose and throat [ENT], maxillo-facial and dental surgery
- Recognise the specific problems encountered with a ‘shared airway’ and know the principles of how to manage these correctly

Core clinical learning outcomes

- Deliver perioperative anaesthetic care to ASA 1-3 adults, and ASA 1 and 2 children over 5, for non-complex ear, adeno-tonsillar and nasal surgery under direct supervision

Minimum requirement of WBPAs = 3 on e-portfolio. However, this may be regarded as a minimum and other evidence must be presented in other ways as set out below. Uploads should include items from teaching /training/audit sections also.

Essential WBPA	1 x DOPS; 1 x ACEX; 1 X CBD - can be any relevant as per curriculum at address above under head, neck, maxillo-facial etc.
Logbook / portfolio WBPAs / tutorials to show; Haven't a clue; there are 9 knowledge competences listed and 5 skills listed – should they do them all and produce in logbook? Should they have a SJH logbook? Or should we say 80% or something – think where it says basic they're supposed to do it all before they move on???	
Consultant feedback	Local Consultant feedback from trainers. Much emphasis will be put on the feedback from local trainers to determine whether the trainee has reached the expected standard.
Teaching /training / Audit	Can be included to demonstrate any skill or knowledge competence.
