SATV Saturator

Operation Manual

SATV overview

SATV is an analogue modeled saturation plug-in that adds harmonic depth and richness to any track. Equally suited to individual instruments or multi-track drum kits, SATV allows you to effortlessly change the harmonic content and dynamics of your whole mix.

The four selectable saturation models: Transistor, Transformer, Tube and Tape allow a wide range of sound shaping options, from subtle warming to extreme crunch. The Group control allows all instances with the same number to be controlled as a group, making ensemble changes easy.

System requirements

Windows: Windows 10 64bit

OSX: OS X 10.9+ 64bit Intel and ARM

Formats: VST2, VST3, Audio Unit, AAX

Installation

Download the latest installer from <http://www.mellowmuse.com/SATV>.

Without a valid license the plugin will run in demo mode, inserting silence in the audio output at random intervals.

Authorize online

On purchase you will be emailed a serial number. With an active network connection in place, load the plugin in your DAW and click the info (i) button in the bottom right hand corner. Enter the email address you used when purchasing and the serial number. The plugin will connect with our server to authorize.

Authorize offline

You can also login and download your license files via our user area at: <http://www.mellowmuse.com/user>. Unzip the downloaded xxx.lic file and place in the following folder:

Windows: /Program Files/Mellowmuse/Licenses

Macintosh: /Library/Application Support/Mellowmuse/Licenses
