

# CABWI Water Industry Qualifications

CABWI is a nationally-recognised awarding body that offers competence-based and knowledge-based qualifications in the QCF. Competence-based qualifications are designed to be undertaken in the workplace. They allow learners to demonstrate their skills by producing evidence from their work activities, to meet the qualification requirements (which are based on national standards). We offer a number of competence-based qualifications for water and utility skills. CABWI's knowledge-based qualifications are designed to provide learners with the underpinning knowledge that supports their job role in the water and utilities industries. They are assessed using question papers, assignments and practical exercises.
