

Carbon Reduction Plan

Supplier name: Morris+Company Limited

Publication date: 20th October 2025

Commitment to achieving Net Zero

Morris+Company Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 (January 1 st 2024 – December 31 st 2024)
Additional Details relating to the Baseline Emissions calculations. Morris+Company is publishing their first CRP Report in October 2024 with a carbon footprint of 85.71 tCO₂e. They have one office as organizational boundary. All their calculations have been done with primary data and none of them have been estimated. The carbon footprint was calculated according to the Greenhouse Gas Protocol, Corporate Standard and Scope 3 Standard. The “operational control approach” was used for the calculation. The emission factors used are from Ecoinvent 3.11, DEFRA, and ClimatePartner’s own database. The following emission categories were included in the carbon footprint assessment: 1.3 Stationary Combustion 2.1 Purchased electricity 3.1 Purchased goods and services 3.3 Fuel and energy related activities not included in scope 1 or 2 3.5 Waste generated in operations 3.6 Business travel 3.7 Employee commuting Morris+Company have no relevant emissions on certain categories. These are the reasons: 1.2 Vehicle Fleet: there is no vehicles own by the company

1.3 Cooling: there has not been any refrigerant leakage in 2024		
Baseline year emissions: 2024		
Scopes	Emission categories	TOTAL (tCO ₂ e)
Scope 1	1.2 Stationary Combustion	0.44
Scope 2	2.1 Purchased electricity	7.06
Scope 3	3.1 Purchased Goods and Services	46.02
	3.3 Fuel and Energy Related Activities	3.61
	3.5 Waste generated in Operations	0.0
	3.6 Business Travel	21.57
	3.7 Employee Commuting	6.99
Total Emissions	85.70	

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0.44
Scope 2	7.06
Scope 3 (Included Sources)	78.20
Total Emissions	85.70

Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the **next five** years to **77.13 tCO₂e** by 2030. This is a reduction of 10%:

Scope 1

Emissions within Scope 1 are minimal relative to the company's overall emissions. As such, there is currently limited opportunity for further reductions.

Scope 2

In 2024, Morris+Company Ltd reported 7.06 tCO₂e in Scope 2 emissions. We aim to reduce these emissions by 5% by 2030 by transitioning to an energy provider that supplies renewable or green energy.

Scope 3

In 2024, Morris+Company Ltd reported 46.02 tCO₂e from purchased goods and services under Scope 3. We plan to achieve a 5% reduction by 2030 through targeted initiatives, including:

- External Computing + Data centre:
 - o Green energy sourcing: Select data centres that run on renewable energy (e.g., wind, solar, hydro). Many hyperscalers (Google Cloud, AWS, Microsoft Azure) publish their carbon intensity.
 - o Select other location for the data centre with cleaner grids.
 - o Optimise usage by avoiding over-provisioning VMs, storage, or network capacity.
 - o Storage efficiency: Archive or delete unused data; choose energy-efficient storage tiers.
 - o Improve software efficiency by running flexible workloads during off-peak hours when renewable penetration on the grid is higher.
 - o Optimise usage, and options for powering down computing when not in use

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed by Morris+Company Ltd, implemented, or ongoing since our last report, demonstrating our continued commitment to the reduction of emissions. These measures will continue to be in effect until our next reporting period:

- Attainment of and continued adherence to ISO 14001
- Environmental and Local Purchasing Policy in place (see attached)
- B Corp Certification: in progress

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Green Low Carbon Travel Policy

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Mr Adrian Joseph Morris

(Founding Director)
