

NATIONAL AUDIT OF CARE AT THE END OF LIFE

Bereavement Survey

We would like to offer our sympathies to you and those around you following the death of your loved one.

Participating in the survey is voluntary. If you can take part, we are grateful to you for sharing your personal experiences. Your feedback is invaluable and will play a crucial role in enhancing hospital care across England, Wales and Jersey.

About NACEL

NACEL, the National Audit of Care at the End of Life, is an audit which aims to improve end of life care across the UK. The data collected from this survey is a valuable element of NACEL. For more information about all aspects of the NACEL and the audit outputs please visit: www.nacel.nhs.uk.

At this time, the NACEL is reviewing the quality of care delivered to adults (18+) within hospital wards. Unfortunately, the audit does not currently collect feedback regarding the care of children, people who died within an Emergency Department (ED), or for those who died suddenly and unexpectedly.

If your loved one matches any of the above descriptions and you would like to submit feedback regarding the quality of their care, we ask that you please contact the local hospital directly.

Guidance

We value your perspective and experiences; your input can truly make a difference to the quality of end of life care across the UK. However, we understand that this survey may bring back strong memories and emotion. You do not have to continue with the survey, or you can stop to take a break and complete it later. Contact details for bereavement support can be found at the end of the survey.

Please note, the survey is separate from the hospital's compliments and complaints process. If you want to raise a compliment, concern or complaint with the service provided, please contact the hospital directly.

About confidentiality and data protection

The information you provide in the survey is anonymous and confidential.

By completing the Bereavement Survey, you are agreeing to the use of the information you provide in the National Audit of Care at the End of Life reports.

Notes on completing the survey.

The survey will take around 5-10 mins to complete.

Please do not close your browser during completion of the survey as answers will not be saved until the submit button is pressed. Once you have submitted your response, no further changes can be made.

You may be filling in the survey about a relative, friend or someone you cared for. To avoid confusion, we refer to the person who died either as 'the person' or 'they/them/their' throughout the survey.

Thank you for taking part in the survey.
