Authorship

(Supplement Section G)

- Clarify roles within author list – use author agreements
- Responsibilities remain (refer to ICMJE criteria)
- Note that contributor status might be more appropriate
- Consider including patients/advocates as authors

Working groups

(Supplement Section F)

- Should be publication/data-set specific
- May be a subset of a steering committee – keep roles clear
- May have group for authorship adjudication (e.g. programmes/large clinical trials)
- Membership of working group does not equal authorship
- Consider including patients/advocates as group members
