

Laptop Specifications for new students 2020/21

Many of the specifications listed are only **recommended**, to ensure that your machine is capable of using the programmes that your course commonly uses, and to cope with the rigours of everyday use at a digital institution. Minimum specifications are listed where available, but please exercise your own judgement when purchasing your own laptop, bearing in mind it should last the duration of your studies and beyond. Students eligible for the John Smith Aspire Bursary can find suitable machines on their [website](#).
