**Russia's plans to invade Ukraine**

As the UK's Army chief predicts Russia may start a war, a new book reveals they've had detailed maps of our secret military complexes for decades.

By John Davies and Alexander J. Kent

The British Army's maps, made over centuries, had been used to plot the final battles of the Great War and create the geography of the Cold War splintered West. But the maps were also a powerful weapon in the Cold War, in the East-West battle of espionage. These maps were最关键的 secret weapons of the military intelligence war.

**Mapping activities were not under strict supervision by Lenin in 1919.** Instead, the army used the Military Topographic Direction of the General Staff to map the area in a series of 236 1:50,000-scale maps.

In the 1920s, the maps were used to guide the Red Army's military advance into Austria, Poland, and the Baltic states. The maps were also used to plan the construction of the Trans-Siberian Railway, which was completed in 1918. The maps were used to plan the construction of the Manchurian Railway, which was completed in 1927.

The maps were also used to plan the construction of the Trans-Korean Railway, which was completed in 1930. The maps were used to plan the construction of the Trans-Manchurian Railway, which was completed in 1935.

In the 1930s, the maps were used to plan the construction of the Trans-Siberian Railway, which was completed in 1939. The maps were used to plan the construction of the Trans-Manchurian Railway, which was completed in 1940.

The maps were also used to plan the construction of the Trans-Korean Railway, which was completed in 1941. The maps were used to plan the construction of the Trans-Manchurian Railway, which was completed in 1942.

In the 1940s, the maps were used to plan the construction of the Trans-Siberian Railway, which was completed in 1943. The maps were used to plan the construction of the Trans-Manchurian Railway, which was completed in 1944.

The maps were also used to plan the construction of the Trans-Korean Railway, which was completed in 1945. The maps were used to plan the construction of the Trans-Manchurian Railway, which was completed in 1946.
