The publishing house "Jāņa Sēta" LTD was founded in 1991 as a private enterprise. During the last year, since cartography has become its main branch of activities, most up-dated information and high printing qualities in map production have been achieved by professional cartographers and printers of the company.

In 1992/93 a large variety of maps have been prepared and published – road maps of the Baltic States carrying detailed information about the pavement of roads and place names in the original languages of each country, several city maps.

Most of the information on the maps is available for the first time since World War 2. In 1993 maps of the Northern Europe and the Western part of the former USSR providing similar information will be published.

In June 1993 the first exclusive cartography shop in the Baltic States will be opened by our publishing house in the centre of Riga. We would like to draw your attention to the fact that not only our publications but also the former Soviet Army General Staff maps of the Northern Hemisphere, which have been classed as a military privileged information for more than fifty years, will be available.
