

Choosing the right size

Top tip! For the best fit and *a perfect drape*, choose a curtain width that matches the length of your pole or track. This set includes two panels designed to hang together and cover the width shown.

Measure your pole or track length.

- 1 Choose a curtain width closest to this measurement.*
- 2 Measure from the top of the pole to the underside of your window sill, or to the floor, depending on where you want your curtain to drop to.
- 3 Choose a curtain length closest to this measurement.

**If you prefer a fuller curtain gathering, size up on the width measurement.*

Which header type should I choose?

Take our quick & easy quiz to find out which option is best for you...
