

## Environmental Policy Statement

Rundle & Co believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner. Our accreditation to ISO 14001:2004 demonstrates this commitment.

We recognise that the pursuit of economic growth and a healthy environment are closely linked and that ecological protection and sustainable development are collectively the responsibility of government, businesses, individuals and communities. We appreciate the need for the world to conserve and recycle its resources.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as a fundamental part of our strategy and operating methods. It is our priority to encourage our customers and suppliers to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

We will:

- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Minimise our waste and then reuse or recycle as much of it as possible.
- Minimise energy and water usage in our buildings, vehicles and processes to conserve supplies, and minimise our consumption of natural resources.
- Operate and maintain company vehicles with due regard to environmental issues as far as practical and encourage the use of alternative transport and car sharing.
- Apply the principles of continuous improvement in respect of air, water, noise and light pollution from our premises and reduce environmental impacts from our operations.
- As far as possible purchase products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products we intend to introduce.
