OUR COMMITMENT TO THE PEOPLE OF SCOTLAND

For more than a decade, SCAPE Scotland has partnered with both nationally recognised and local construction companies to deliver fully compliant framework services across Scotland.

The foundations of our framework methodology are borne from a steadfast commitment to public service.

As a team of public sector professionals, we share the same values as local and national government. Those values form a promise that we make to each organisation we support.

That is to help you deliver your essential projects to the highest possible standard. And that standard is set by you.

We fully appreciate that the local economy is your primary concern. It's ours too.

Investing in and engaging with local businesses and communities, keeping the pound local and ensuring fair payment terms to SMEs are as important to us as time, cost and quality.

Drawing from our fully transparent performance management processes, this short report illustrates the performance and local economic impact of projects delivered through our frameworks across Scotland.

Our commitment to you and the communities you serve, is solely to help you deliver your objectives.
