Scheme Member representatives: Mr B Johnson and Mr G Marshall

Executive Director of Corporate Services/Section 151 Officer and Scheme Manager, Monitoring Officer/Secretary, Director of People and Development, Head of Finance, Procurement Manager, Finance Manager, Finance Officer and Committee Manager.

The meeting was held at the Humberside Fire and Rescue Service Headquarters, Kingston upon Hull. Meeting commenced at 10.30a.m.

The Monitoring Officer/Secretary took the chair.

- 1/19 APOLOGIES FOR ABSENCE There were no apologies for absence.
- 2/19 DECLARATIONS OF INTEREST -There were no declarations of interest.

3/19 ELECTION OF THE CHAIRPERSON OF THE PENSION BOARD 2019/20 -

The Monitoring Officer/Secretary submitted a report on the appointment of a Chairperson for 2019/20 indicating that the appointment of a Chairperson was an annual decision made at the Annual General Meeting of the Authority or that the Chairperson was elected at the first meeting of the Pension Board following the Annual General Meeting. The Terms of Reference of the Pension Board as set out in Article 10A of the Constitution provided that the position of Chairperson would normally rotate on an annual basis between the Employer's representatives and the Scheme Member representatives on the Board. In 2018/19, the Chairperson had been a Scheme Member representative.

Resolved - That Councillor Shepherd be appointed Chairperson.

Councillor Shepherd took the chair.

4/19 MINUTES - Resolved - That the minutes of the meeting of the Board held on 25 January 2019 be confirmed as a correct record.

5/19 MATTERS ARISING FROM THE MINUTES - Members discussed the following matter arising from the minutes of the meeting held on 25 January 2019:

Minute 6037 - The Executive Director of Corporate Services/Section 151 Officer informed the Board that the judgements in the Lord Chancellor v McCloud case concerning age discrimination in relation to publically funded pensions had found that changes made to pension schemes had discriminated against a group of firefighters and a group of judges on the grounds of age. The Government had since been refused permission by the Supreme Court to appeal the decision and the matter was due to be referred back to the Employment Tribunal for remedy.

6/19 PENSION BOARD COMPOSITION 2019/20 AND TERMS OF REFERENCE - The Monitoring Officer/Secretary submitted a report that confirmed the composition of the Pension Board for 2019/20 as approved by the Fire Authority at its meeting of 3 June 2019:

<u>Employer representatives</u> (2): 1 Elected Member (Councillor Shepherd)

1 Officer (Director of Service Delivery)

Scheme Member representatives (2): 1 representative n

1 representative nominated by the representative bodies via discussion and agreement at the Joint Consultative

Committee (Mr G Marshall).

1 representative selected from expressions of interest by individual HFRS FPS members or those eligible to be HFRS FPS

members (Mr B Johnson)

Resolved - That the report be received.

7/19 CALENDAR OF BOARD MEETINGS 2019/20 - The Monitoring Officer/Secretary submitted a report indicating that, at the Annual General Meeting of the Authority held on 3 June 2019, the calendar of meetings for the 2019/20 had been agreed.

Resolved - That the report be received.

8/19 REPORTING BREACHES - The Procurement Manager informed the Board that there had been no breaches since the meeting held on 25 January 2019.

Resolved - That the update be received.

9/19 PENSION BOARD WORKSTREAMS - The Executive Director of Corporate Services/Section 151 Officer submitted a report setting out an update on the workstreams that had been agreed at the Pension Board in January 2016. The workstreams were designed to ensure that the Board operated in compliance with the Pension Regulator's Code of Practice for pension boards.

The Executive Director of Corporate Services/Section 151 Officer explained that the Board's first training event of 2019/20 would be held on 9 October 2019 at 10.00am. The risk register (Appendix 2) had been updated in accordance with legislative changes. Appendix 3 to the report outlined performance in relation to its key performance indicators (KPIs). The pension fund administrators had received a high volume of requests for pension estimates from scheme members following its issuing of Annual Benefits Statements. This had resulted in significantly increased workloads during the third quarter as the requests had coincided with other, statutory deadlines, which had meant that some requests had not been addressed within the targeted period of time (10 days) during October and November 2018. There had also been a backlog of cases relating to setting up deferred benefits following the cessation of scheme members' employment. The backlog had reached its worst in December 2018, but had been successfully addressed during the intervening months. The fourth quarter's KPIs represented a significant improvement in relation to the third and delays in fulfilling scheme members' requests had reduced.

Appendix 4 to the report summarised the current scheme membership. Of the scheme members:

- 80 percent were enrolled in the HFRS 2015 Pension;
- 13 percent were enrolled in the HFRS 1992 Pension;
- 6 percent were enrolled in the HFRS Modified Pension;
- 1 percent were enrolled in the HFRS 2006 Pension.

Resolved - (a) That the report be received, and

(b) that the quality of the biannual Pension Newsletter produced by the West Yorkshire Pension Fund be commended.

10/19 2018 ANNUAL BENEFIT STATEMENT SURVEY - RESEARCH PROJECT - The Finance Officer provided a report to the Board summarising the outcomes of the Scheme Advisory Board's Annual Benefit Statement Survey of 2018.

Of the 47 fire and rescue authorities (FRAs) surveyed in England and Wales, 66 percent responded. 95 percent of respondents indicated that they had met statutory deadlines in relation to the provision of Annual Benefits Statements (ABS) to scheme members. Just under 70 percent of respondents indicated that they used their own version of the ABS template and almost a quarter indicated that they used their system providers' methods. There was a need to encourage software providers to implement changes to support the HFRS Modified Pension Scheme as the process of producing ABSs required more manual input than for other schemes.

Resolved - That the report be received.

11/19 PENSIONABLE PAY GUIDANCE (BOOTH V. MID AND WEST WALES) - The Finance Officer submitted a report summarising the recent High Court judgement on the case of Booth v Mid and West Wales.

While the judgement had related to pay for the Welsh Firefighter Pension Schemes, the points of judgment would apply equally to English Firefighters Pension Schemes. One of the issues in the case was that the 2006 and 2015 regulations had not provided definitions of the term 'temporary' in relation to employees' job titles and pensionable pay. Justice Fancourt concluded that 'temporary' should be read "...in the sense of being occasional, one-off, irregular or for a limited period of time only". However, the Director of People and Development reminded the Board that such terms and definitions would not necessarily align with their equivalents in terms of human resources and employment law, but only in relation to pensionable pay. Additionally, each of the pension schemes were subject to different conditions.

Resolved - That the report be received.

12/19 PENSION FUND ACCOUNT 2018/19 INCOME AND EXPENDITURE - The Finance Manager submitted a report summarising the Pension Fund Account income and expenditure for 2018/19.

The report enclosed with the agenda was subject to audit and the audit process was due to conclude in following weeks. The Pension Fund Account deficit had reached £13m, £11m of which had been addressed by funds received from the Home Office, with the remaining £2m to be received by the end of July 2019.

Resolved - That the report be received.

14/19 ANY OTHER BUSINESS – There were no items.

Meeting closed at 10.50 a.m.

Report by the Executive Director of Corporate Services/S.151 Officer

WORKSTREAMS UPDATE

SUMMARY

- 1. This report sets out an update on the workstreams that were originally agreed at the Pension Board in January 2016.
- 2. The workstreams are designed to ensure that the Board operates in compliance with the Pension Regulator's Code of Practice for Pension Boards.
- 3. The list of activities is not exhaustive and has evolved over the last 12 months and will continue to do so over the coming months.

RECOMMENDATIONS

4. That the Board considers the workstreams that are set out in this report.

WORKSTREAMS

- 5. Appendix 1 of this report sets out the workstreams proposed for the Pension Board over the short-to-medium term.
- 6. The workload aims to meet the requirements of the Code of Practice for Pension Boards and has therefore been shaped into three broad areas:-

Governance, Administration and Communication

7. The elements that are timetabled to be reported upon at this meeting are set out below:-

Governance

G3 workstream - Training

Training has been delivered at regular points since the inception of the Board in July 2015.

In September 2017 a training session for Pension Board Members and Officers was delivered by colleagues from LGA Pensions and the Pensions Regulator and more recently training in relation to tax was delivered in October 2019.

G5B workstream - Summary of Complaints Received

A clear process for complaints has been adopted and is a key component of the governance of the Firefighter Pension Schemes (FFPS).

There have been no complaints in relation to our administration of the FFPS in 2016/17, 2017/18, there was one complaint in 2018/19 which has now been concluded, and there has been one complaint in 2019/20 to date.

G6 workstreams - Risk Register

The Authority's team involved in the operation of the FFPS have developed a comprehensive Risk Register attached as Appendix 2.

The Risk Register identifies the three most dominant risks as the maintenance of Member data (Risk 2), over reliance on key pensions administration officers (Risk 6), and also legislative change (Risk 7).

These risks reflect the recent significant changes in the FFPS which have brought a much greater emphasis on the completeness and accuracy of data and a number of fundamental scheme changes and legal rulings.

All of these risks will be monitored carefully and it is felt that the mitigations and controls in place at present are sufficient.

Administration

A1 workstream - KPIs and Benchmarking, SLAs

The Service now has an agreed set of Key Performance Indicators (KPIs) with West Yorkshire Pension Fund (WYPF) who act as administrators of the FFPS on our behalf.

The KPIs are monitored and reported on monthly. Appendix 3 sets out the position for quarters 1 and 2 of 2019/20.

The data shows good performance in most of the key areas.

The KPIs provide a sound basis on which to manage performance going forward.

A2 workstream – Costs per Member and Number of Scheme Members

Appendix 4 sets out the latest position of scheme members including those currently contributing to the 1992, 2006 and 2015 schemes and those in receipt of a pension. This information will be brought to each Board meeting.

Communication

There have been no further newsletters issued by WYPF since the last meeting.

STRATEGIC PLAN COMPATIBILITY

Risk Matrix

The following model rates the impact and likelihood of an identified risk using a scale of 1 to 5.

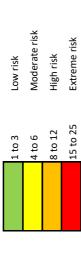

The likelihood score is multiplied by the impact score (as shown in the table) to give an overall risk score.

The final score will influence the level of monitoring and/or control required in relation to each risk.

FIREFIGHTERS' PENSION SCHEME ADMINISTRATION AND BENCHMARKING REVIEW

SUMMARY OF FINDINGS

Scheme is managed by 45 FRAs, with 89,000 members Responses received from all 45 FRAs and 3,958 members

Do members receive a good service?

Are the right benefits paid at the right time?

20% of administrators do not send members a notification of joining the Scheme 2 months from joining (or 1 month from receiving jobholder information where the member is being automatically re-enrolled)

Member must receive notification of retirement benefits 1 month from date of retirement if on or after normal pension age, or 2 months from date of retirement if before normal pension age. All administrators worked to a shorter timeframe than legislation required

Not clear whether benefits paid at the right time to all members due to lack of clarification in the survey responses

Online communications

64% of administrators do not provide members with online self-service facility

Complaints

11 administrators had no IDRP complaints 22 administrators had between 1 and 5 in the last 3 years 10 administrators had between 5 and 10 in the last 3 years 1 administrator had over 20 in the last 3 years

Scheme member perspective

Whilst many members agree or strongly agree that they get information that is clear and concise, the majority didn't comment, with more strongly disagreeing regarding the following issues than strongly agreeing:

Timeliness of communication
Regularity of updates
Clarity of communication
Appropriateness of methods of communication
Clear and timely response to questions/requests

Administration cost per member?

A number of FRAs did not provide complete information so accuracy of figures could not be checked

Average cost per member was £76.80 in 2018 (taking into account internal FRA staffing costs and external admin and software costs, but excluding the cost of special projects) This rose to £120.33 when taking special projects into account

Themes

Complexity of the Scheme

A quarter of FRAs believe they have an average understanding of the Scheme (rather than good or excellent)

66% of FRAs find it difficult to make decisions in relation to the Scheme where there are discretions e.g. pensionable pay and ill health retirements, due to the complexity

22.25% (855) of members did not understand the benefits the Scheme offered and 39.43% (1,515) were unsure

32 out of 37 FRAs who commented referred to the need to reduce complexity or increase clarity and simplicity around various aspects of the Scheme

Relationships - interaction and perception

30 administrators rated the service levels they offer in relation to income they receive as excellent

86% of administrators feel FRAs are appropriately resourced to provide them with required information/data

Primary reason to change administrator was end of contract, only 18% changed due to cost effectiveness/unsatisfactory service

Reporting

59% of administrators do not report back to FRAs on the FRA's performance

11% of administrators do not report back to FRAs on their own performance

43% of administrators do not report to the local pension board

Data

Only 18% of administrators were concerned about timeliness of information received from FRAs

Only 9% of administrators were concerned with data quality

• Engagement and communication

68% of administrators felt that Scheme members have greater expectations than members of other schemes they administer

22 administrators felt unsure about whether members actually understood what they received, with only 3 feeling completely confident that members understand the information they receive

27% of members do not know who their administrator is

61% of members partly understand or don't understand the Scheme

Over 500 comments were made about the service and communication provided, there were many concerns about the level of customer service received

Breaches of the law

1 administrator indicated that they had 2 breaches over the past 3 years (both of which were reported to TPR)

4 FRAs indicated they had breaches over the past 3 years (3 with 1 and 1 with 2) but we do not know if these were reported to the regulator

These numbers are surprisingly low and do not align with information from TPR

Costs

In order to assess value for money, it is necessary to compare with other UK pension schemes:

LGPS costs

Cost per member £30 2017/18

However, the LGPS is a materially larger, multi-employer, funded scheme so not directly comparable with a national unfunded scheme that is administered locally.

- Private sector schemes

2012 data suggests

£182 for schemes above 5,000 members (based on 24 schemes)

£281 for schemes between 1,000 and 4,999 members (based on 75 schemes)

£505 for schemes between 100 and 999 members (based on 106 schemes)

This includes monitoring of investments, asset managers, actuarial valuations, covenant assessments and monitoring of the sponsoring employer, there are also additional compliance requirements.

Allowing only for administration costs the average per member costs were:

£53 for schemes above 5,000 members (based on 25 schemes)

£89 for schemes between 1,000 and 4,999 members (based on 77 schemes)

£172 for schemes between 100 and 999 members (based on 110 schemes)

Difficult to draw too many conclusions from data as cannot guarantee a like for like comparison. However, the cost of administering the Scheme does seem quite high relative to LGPS and largest private sector schemes.

It may be premature to conclude that cost savings can easily be made due to the complexity of the Scheme, and the data is incomplete, so assumptions have been made. There are also likely to be more "special projects" in the future, specifically surrounding GMP and McCloud.

RECOMMENDATIONS

- Reduce complexity in the Scheme
- (1) Scheme changes and structure
- Reduce local decision making (discretions)
- Simplification project similar to that which is taking place for the LGPS
- Greater regard to the administrative implications of legislative changes (recognise that administration should not drive policy, but greater attention could be paid to the administrative implications of future changes)
- Review the overall structure of the Scheme to ensure the model of delivery is fit for purpose. It could be argued that some elements of complexity arise from the current structure of 45 Scheme Managers and 19 administrators. Scheme Managers are differently constituted (combined authorities, FRA function may sit with PCC, mayor's office or county council) – is this structure a barrier to consistency?
- There is no visibility on how much it costs to manage the Scheme. Scheme Managers fund pension costs arising from the administration and management of the Scheme from their operating accounts. The top up grant covers pension costs only, not admin costs. There may be more incentive for the Govt to limit complexity if those costs were more visible.
- Hutton report in 2011 suggested efficiencies by sharing contracts and combining support services, including outsourcing. Some of this has already taken place, but 45 Scheme Managers remain in place. Greater focus should be placed on achieving an optimal structure to deliver increasingly complex Scheme.

(2) Improving monitoring

- Improving local monitoring by way of administrators providing at least quarterly information to the Scheme Manager against a set of nationally recommended performance measures
- All local pension boards should be in receipt of performance statistics on a regular basis to enable them to monitor standards and ensure compliance in relation to administration of the Scheme
- National collection of data (such as that collected for this survey) on an annual basis.

(3) Engagement and communication

- Greater use of technology to enhance member experience (member self-service facilities) accompanied by clear communication to explain benefits in writing or through member engagement events
- The Board should consider how they can encourage greater engagement from FRAs and administrators to use information and communications that are already provided centrally (areas of concern raised in the survey were annual and lifetime allowance calcs and pensionable pay information available should be highlighted to key stakeholders)

Collaborative approach to address data issues

The Board's Administration and Benchmarking Committee is working to review terminology used in the annual return to TPR which will help ensure a consistent approach to information provided by FRAs and administrators

Administrators should also be encouraged to provide timely reports to FRAs on data issues, in line with a data improvement plan to provide a clear framework, and consideration should be given to involving local pension boards in this process

Greater electronic provision of information between FRAs and administrators to assist in timely provision and regular collection of data, which will drive accuracy

Training could be made available centrally, as well as suggested frameworks, performance metrics and the use of penalties

Provide clarity on timescales for key processes through a locally developed Administration Strategy

Suggest that the Board considers recommending regulatory changes to encourage best practice among all Scheme Managers/FRAs and administrators. This could be achieved by requiring each Scheme Manager to have a locally developed pensions administration strategy to set out the Scheme Manager's aims and objectives. Performance against those aims and objectives must then be appropriately measured and monitored, and plans put in place to address areas of concern.

A range of target timescales should be determined by each FRA and they may wish to set shorter than legal timescales, the strategy should be publicly available. The Board should assist in setting timescales and KPIs

Greater engagement between administrators and FRAs

Recommend stronger links are forged between the administrator and FRA to the local pension board to ensure performance is being monitored locally and issues identified.

Local pension boards should play a key role in improving the administration of the Scheme in promoting the existing range of LGA training materials and signposting information which is already centrally available

• Reduce key person risk and ensure resource plans in place

FRAs in conjunction with administrators should have clear business plans in place which are regularly reviewed and monitored. More precise reporting should be undertaken to allow for comparison and review of one-off activities

Better understanding and recording of breaches

FRAs, administrators and local pension boards should familiarise themselves with existing resources on how to record and report breaches of the law.

Each FRA in conjunction with their administrator should revise its local policy and procedure on reporting breaches, including details of where the information is logged, who should be consulted and to whom it should be reported

Annual central data collection exercise

This is the first time an exercise to gather cost data across the Scheme has been undertaken – this is the first step to an evidence based approach to ensure the effective and efficient administration of the Scheme.

The Board should develop a template for collection of administration and associated costs on an annual basis, with the cost information being published on the Board's website

If the Board is able to monitor costs over time, it may be able to ascertain whether special projects are continuing to lead to additional costs and work for FRAs and administrators, and whether administration business as usual is becoming more or less costly

Once these trends have been identified, it should be easier to identify what action can be taken to achieve greater cost efficiency in the delivery of Scheme benefits, without compromising the quality of service to members

Public Service Governance and Administration Survey 2019

This document is intended to be used as a guide to help you gather the information required for the survey. Please note, however, that we need you to complete the questionnaire through the <u>online survey link</u> contained in your invitation email.

Thank you for taking the time to complete this survey. Please answer the questions in relation to the scheme referenced in your invitation email. Where the scheme is locally administered, we mean the sub-scheme or fund administered by the local scheme manager.

Your responses will be kept anonymous unless you consent otherwise at the end of the survey. Linking your scheme name to your answers will help inform The Pensions Regulator's (TPR's) engagement with you in the future.

This survey should be completed by the scheme manager or by another party on behalf of the scheme manager. They should work with the pension board chair to complete it, and other parties (e.g. the administrator) where appropriate.

There is a space at the end of the survey to add comments about your answers where you feel this would be useful.

SECTION A – GOVERNANCE

The first set of questions is about how your pension board works in practice.

A1. EVERYONE TO ANSWER

Does your scheme have a documented policy to manage the pension board members' conflicts of interest?

Please select one answer only

2016 valuation data - High level summary of data issues - Humberside

Introduction

Following completion of the Firefighters' Pension Schemes (England) actuarial valuation as at 31 March 2016 we have been commissioned by the Home Office to summarise issues that were identified in the data submitted for the valuation for each Fire and Rescue Authority (FRA). This note sets out the key areas where data was excluded from the 2016 valuation for Humberside. The purpose of the note is to inform where improvements to the member data held/provided for valuations could be focussed to enable more data to be included for the 2020 valuation.

Chart 1: Proportion of Humberside members excluded from liability calculations by membership

Chart 1 shows the proportion of active/pensioner membership records used for the liability calculations. Data for deferred members had very few issues and make up a small proportion of the member population, so have not been included in this note.

Background

As part of the 2016 valuations, individual member data was provided by each of the FRAs. The member data underwent standard checks to confirm validity and reliability.

For the liability calculations, member records that failed checks were excluded and replaced by data for average members of the same category to which the excluded member was originally assigned. For the experience analyses, FRAs were excluded where we were unable to reconcile the data between 2012 and 2016. Assumptions were set using data from a subset of all of the data received.

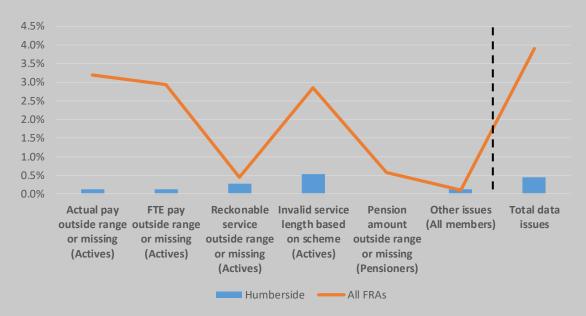

Limitations

This note is intended solely for the use of the Humberside Fire and Rescue Authority and Home Office. It briefly summarises some suggested data improvements to enable more of the scheme's data to be included in the 2020 valuation process. Very detailed checks are not required for valuation purposes, further investigation may identify additional areas that would benefit from improvement for other purposes (e.g. the correct payment of benefits). The information and advice in this note should not be relied upon, or assumed to be appropriate, for any other purpose or by any other person. GAD does not accept any liability to third parties, whether or not GAD has agreed to the disclosure of its advice to the third party. This work has been carried out in accordance with the applicable Technical Actuarial Standard: TAS 100 issued by the Financial Reporting Council (FRC). The FRC sets technical standards for actuarial work in the UK.

Finlaison House 15-17 Furnival Street London EC4A 1AB 020 7211 2601 www.gov.uk/gad

Chart 2: Proportion of members excluded from Humberside compared to all FRAs combined

Chart 2 shows the main areas in which data failed our standard checks for the liability calculations with the proportion of excluded active/pensioner membership records falling into each area.

For active members, the main issues related to pay or service data. For pensioner members it was missing pension amounts or figures that were outside of the range that we set as reasonable. In order to reduce the number of excluded records in the 2020 valuation we recommend that you focus on improving the data collected and provided in these areas.

Next Steps

To improve the data stored and provided for liability calculations, it may be helpful to revisit the pay/service entries (in the tab "Data – Active – Checks") and pension amount entries (in the tab "Data – Pensioners – Checks") in the data collection spreadsheet that you submitted to us for the 2016 valuation. In many cases, cells that contain data that failed our checks will be highlighted. You may be able to make system improvements to prevent entries from being blank or investigate and update those which fall outside of range.

Next Steps

In order to use your movement data we must be able to reconcile your data from the start to the end of the valuation period and require pension at death for pensioners/dependants. The active, pensioner and dependants movements summary tables in the "Control" tab of the data collection spreadsheet give an indication of how well the data reconciles. When submitting data, please provide supporting comments if there is a genuine reason that your data does not reconcile (e.g. data improvement exercise carried out) so that we can include as much data in the experience analyses as possible.
