1. INTRODUCTION

HFRS value and support its staff and aim to ensure that it develops and cultivates a highly trained and competent workforce.

Occupational competence is defined as the ability to consistently apply knowledge, skills and attributes to achieve the proficient performance of workplace tasks. The HFRS Competence Policy is aligned to the [National Operational Guidance for competence and training](#), and applies to all staff, specifically:

- Full-Time
- On-Call
- Control
- Non-Operational support staff

This policy outlines how HFRS will support, manage and assess occupational competence.

Core Code of Ethics

HFRS has adopted the Core Code of Ethics for Fire and Rescue Services. The Service is committed to the ethical principles of the Code and strives to apply them in all we do, therefore, those principles are reflected in this Policy.

National Guidance

Any National Guidance which has been adopted by HFRS, will be reflected in this Policy.

2. EQUALITY AND INCLUSION

HFRS has a legal responsibility under the Equality Act 2010, and a commitment, to ensure it does not discriminate either directly or indirectly in any of its functions and services nor in its treatment of staff, in relation to race, sex, disability, sexual orientation, age, pregnancy and maternity, religion and belief, gender reassignment or marriage and civil partnership. It also has a duty to make reasonable adjustments for disabled applicants, employees and service users.

3. AIM AND OBJECTIVES

Aim

HFRS will support all staff in meeting the skills and knowledge required to demonstrate occupational competence in their role.

Objectives

Assure that staff are provided with appropriate training opportunities and support to meet the competency for their roles and consequently have the necessary skills and knowledge to meet the requirements of the Strategic Plan, Community Risk Management Plan (CRMP) and Reasonable Worst-Case Scenario (RWCS).

ASSOCIATED DOCUMENTS

- Road Safety Act 2006
- Management of Health and Safety at Work Regulations 1999
- Working at Height Regulations 2005
- NFCC – Staff Training & Development
- Fire and Rescue National Framework for England
- Joint Emergency Service Interoperability Program (JESIP).
- Operational Learning
- Equality Act 2010
- Public Sector Equality Duty (PSED)
- Performance and Capability Policy

National Guidance

This policy is aligned to [National Operational Guidance: Corporate Guidance for Operational Activity – Competence and Training](#)

4. STAFF COMPETENCE

Whilst it is the responsibility of HFRS to provide suitable training and education to meet individual role requirements, it is the individual responsibility of staff to maintain their own competence.

Staff competence is based on the skills and knowledge required for individual role maps and relates to the relevant benchmark standards that define competence.

HFRS staff role specific competence are outlined through:

Core Skills Framework (CSF)

HFRS provide a CSF that outlines the knowledge and skills requirements for specific roles within the organisation.

Role Specific Training Outlines (RSTO)

RSTO provides clear definition of the individual knowledge and skills required to demonstrate competence in specific roles within the organisation.

Training Frameworks

Training Frameworks provide detail with regard to how the role specific requirements for acquisition, maintenance of competence and confirmation of competence for specific training is met within the organisation.

5. TRAINING RECORDING

All staff Training will be recorded on the Service Training Recording System (STRS) (currently PDR Pro).

The STRS will.

- Identify the required competencies and associated training frequencies to perform specific roles.
- Record role specific training activities.
- Identify staff who have not used their skills during a set period, indicating the need for refresher training or retesting.
- Confirm if staff have received appropriate and sufficient training specific to their role.

The Service Competency Dashboards will provide a service overview of staff training and competence using data provided by the STRS.

6. ASSESSMENT AND CONFIRMATION OF OPERATIONAL COMPETENCE

Due to the hazards that may be encountered, it is important to be able to identify, at an early stage, operational staff in need of additional support and development.

The assessment and confirmation of competence in HFRS is achieved through:

Workplace Assessment

Conducted at operational incidents through line managers, or as part of the Operational Assurance process. Workplace assessments provide an important contribution to building a

profile of an individual's development by comparing a practical demonstration of underpinning skills, knowledge and understanding of operational response against their role map.

Simulation Assessment

Conducted at training events or exercises, simulated role related activities are used to ensure operational competence is met within specific criteria and required frequencies. The criteria and frequencies for operational staff are aligned to NOG and are set out within the Training Frameworks for the following Core Skills.

- Incident Command
- Breathing Apparatus
- Driving
- Water Rescue and Flooding
- Working at Height

All assessments will be conducted by suitably qualified staff, or by an external training provider with appropriate credentials.

7. FAILURE TO DEMONSTRATE COMPETENCE

Staff who do not attain or maintain the required competency required for their role may be removed from specific competence related activities until a suitable demonstration of underpinning knowledge and skills has been demonstrated.

Failure to maintain competence should be managed by line managers using the framework outlined in the [Performance and Capability Policy](#).

Training Frameworks provide more specific detail with regard to removal from specific areas of competence e.g. Breathing Apparatus, Incident Command.

Staff will be supported to meet the required level of competence through:

- Individual Development Plans; and
- Coaching and Mentoring
