

# Summer work AS Product Design

Minimum 4 pages of A3

**Everything needs to have it's place.** Storage can be discreet and functional to protect or preserve, or decorative and obvious to display it's contents.

Your task is to define a problem, write a brief, do some research to justify your idea, sketch some ideas & come up with a final design with enough detail for a 3<sup>rd</sup> party to make it.

**Please bring your finished work printed out on A3 (or ready to print!) in your first lesson September 2023. Be ready to share!**

Don't get stuck! Any questions, please email. Sarah Savory - Course leader  
[ssavory@yorkcollege.ac.uk](mailto:ssavory@yorkcollege.ac.uk)

**Completion of summer work is mandatory and essential to you gaining a place on this course**

## Write a brief

What problem is being solved?  
Who is your client?  
Where does it need to fit?  
How much will it cost?  
What is it made out of?  
How many will be produced?  
Where will it be sold?  
What will happen at the end of its life -  
Reuse, refurbish, recycle?

A3

## Research & images

**Mood board**  
**Mind map**  
**Interviews with clients**  
**Existing products**

A3

## Design ideas

**3-5 ideas**  
**Sketches**  
**Sketch models if appropriate\***  
**Selected idea**

A3

## Final design

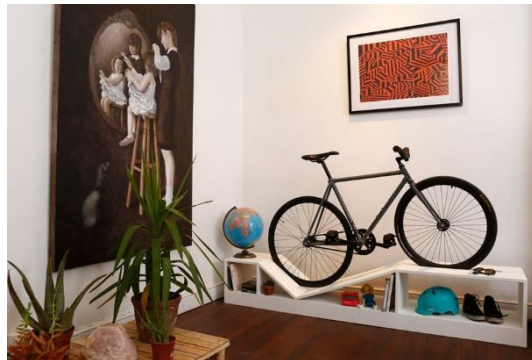

**Drawings to manufacture from including annotation covering**

- Materials
- Sizes
- Colours
