

# Software Engineer

Old Street, London

Want to do something that makes a difference? We're helping more people find and survive skin cancer and need someone to take help build brilliant services for our patients.

You'll be a key member of the development team and will help transform the way people access skin cancer services.

## Who we are?

Skin Analytics is a healthcare company building a clinical quality diagnostic service for melanoma using Artificial Intelligence. We've won a number of awards both here in and in Australia and are adding to our technology team.

We are a small agile team of 7 with ambitions to grow quickly. We want to work with smart people who are self motivated to get things done.

## What will you be doing?

We are looking for a senior and back-end engineer to work with our growing technology team. You will be in charge of:

- Building new features on our commercial platforms (both web and native mobile apps eventually) with the rest of the tech team
- Manage and improve our infrastructure to support business needs
- Coding using best practices to produce high performing/scalable/secured modules
- Supporting and maintenance for our existing application and customers
- Working / participating to our internal R&D on new components

## About yourself

### Must Have

- 5+ years experience developing large scale web applications
- Strong experience with modern backend frameworks (Node.js / Express)
- Experience building RESTful and integrating with 3rd party APIs
- Experience with modern frontend frameworks (Angular 4, React)
- Experience with test driven development and testing frameworks
- Linux (Ubuntu) servers configuration

- Avid user of Git / Bitbucket / Jira / Confluence
- Experience managing web applications & databases while in production
- Experience with unit testing (mocha, jest, jasmine, etc.)
- Ability to work efficiently and iterate often to produce high-quality code
- Know how to RTFM and to RTFS
- Good sense of humour!

## Nice to have

- Familiarity with AWS ecosystem
- Exposure to containerization tools (Docker)
- Experience building backend systems for mobile phone apps
- Experience with Python
- Experience Continuous integration

## Benefits

- Be an integral part of improving the survival rate for the second most common cancer for 24-40 year olds
- Weekly coffee mornings
- Low cost health insurance with Vitality Health
- Potential for share options after initial period
- Great office located among the cafes and bars of Old Street

## Get in touch

This role is an opportunity to take an active role in creating a service that will make a difference to people's lives, so get in touch if this sounds like something you'd like to be involved with.

We will be considering applications on a rolling basis so please send your application (CV + any relevant link/information) ASAP to [recruitment@skinanalytics.co.uk](mailto:recruitment@skinanalytics.co.uk)
