

Having an Ultrasound scan

An easy read guide

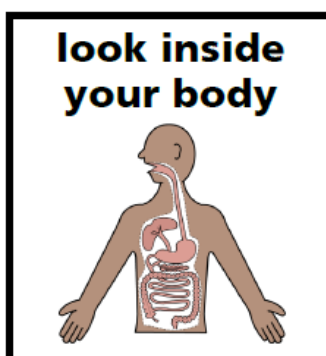

This booklet uses easy words and pictures.

You might want to ask someone to help you read it

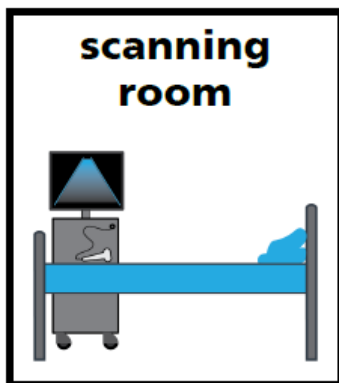

Your doctor has said you need an ultrasound scan

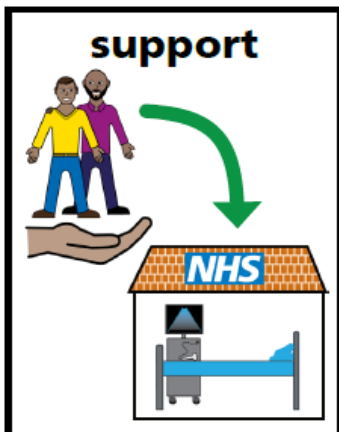

This is so they can look inside your body to see how it is working

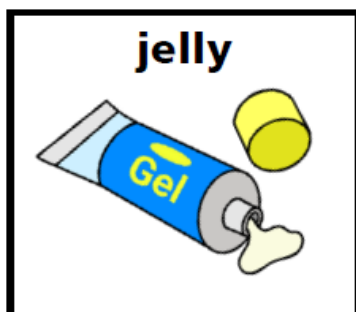

An ultrasound scan does not hurt

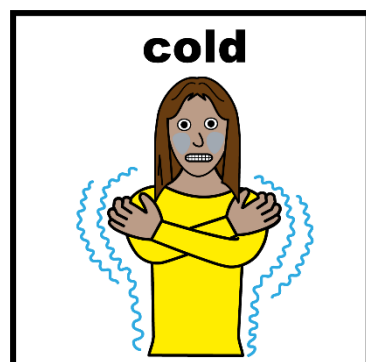

You will go into a room with the scanning machine.

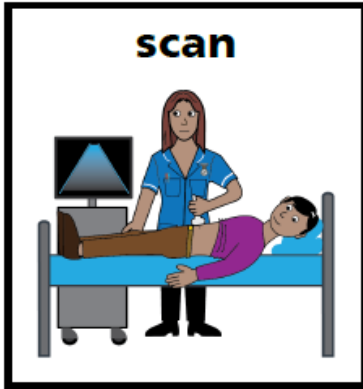

You can take someone in with you for support.

They will put some jelly on your skin where they want to scan.

This may feel cold.

They will then put the scanning probe over your skin.

Let the staff know if you're uncomfortable

When your scan is complete the staff will tell you what to do next

Please bring your hospital passport with you if you have one
