

IBD BENCHMARKING TOOL 2019/2020 RESULTS OVERVIEW

CHESTERFIELD ROYAL HOSPITAL

www.ibduk.org

This report shows results from the IBD Benchmarking Tool 2019/2020, a new way to assess how well services across the UK are providing care against the IBD Standards 2019. It includes information from a self-assessment completed by the IBD Team and from an IBD Patient Survey completed by 76 patients who use this service. This report has been produced by IBD UK, a partnership of patient and professional organisations working together for everyone affected by IBD.

Key

IBD Patient Survey 2019

IBD Service Self-Assessment 2019/2020

The Service in Numbers

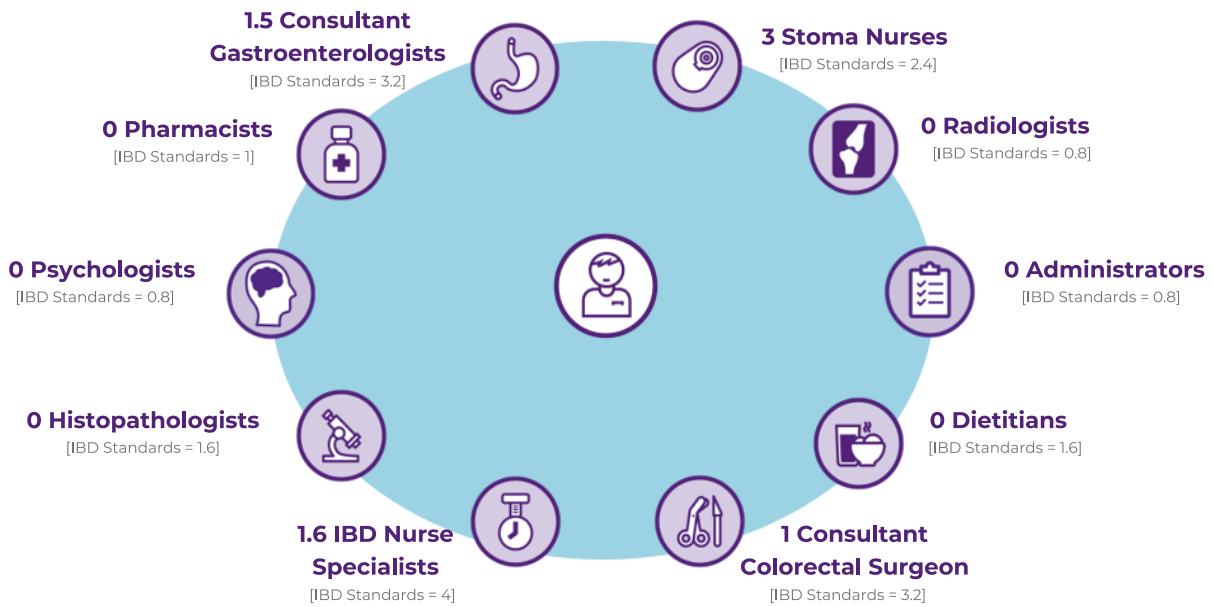

Covers a population of
400,000

Supports
1,600
adult IBD patients

Of which
150
were diagnosed in the
past 12 months

The IBD Team

The IBD Standards define the ideal make-up of the IBD team in terms of full-time roles. Shown below are the actual numbers for this IBD team, with ideal numbers based on population size in brackets beneath.

Quality of Care

Overall, how would you rate the quality of your Crohn's or Colitis care over the last 12 months? [75 responses for this service]

Rated as "Excellent" or "Very good" by **72%** of patients

Rated as "Fair" or "Poor" by **13%** of patients

Rated as "Good" by **15%** of patients

Members of the IBD team have reviewed the results and overall we are pleased with the mainly positive feedback. We aim to look at developing individualised care plans initially for the newly diagnosed, consider a patient panel, more support for inpatients and acknowledge holistic needs.

Patient Journey Overview
