

CASE STUDY - AGENDA LIFE SCIENCES

14 day turnaround time cut to 24 hours with Legalesign eSignature & Voyager Infinity integration

Summary

- Turnaround times slashed
- GDPR compliance
- Voyager Infinity eSignature integration
- Email, print, sign & scan replaced
- 57.6% of documents signed the same day
- Easy to use document tracking
- User-friendly software

It used to take around 14 days for job seekers to return essential privacy policies to recruitment agency Agenda Life Sciences. By using Legalesign's electronic signature and Voyager Infinity more than half of the agreements are now signed within 24 hours, enabling a swifter and slicker recruitment process.

Agenda Life Sciences are specialists in recruiting to life science companies. Part of Agenda Resource Management Ltd, a screening service and marketing and communications company, the whole company employs 160 people and approximately half work within Agenda Life Sciences.

Why is Agenda Life Sciences using eSignature?

Legalesign's software is safe and secure, giving Agenda Life Sciences peace of mind as adhering to the latest privacy policies required by the General Data Protection Regulation (GDPR) is of utmost importance to the company.

With offices in the UK and Europe, the agency's potential candidates can be communicated with swiftly and securely to esign the agreements.

Judith Fowlston (pictured above), head of Agenda Life Sciences, explains, "When somebody registers with us we have to ask their permission to store their data and we email them a six page privacy policy to sign.

"Previously it would take around 14 days to get the agreement signed because candidates would have to read the email, print the attachment, sign it, then scan it or post it back to us."

What are the benefits of eSignature?

Judith explains, "Using Legalesign's electronic signature has made our recruitment processes for the science industry a lot slicker. We didn't use paper before for these agreements so we haven't made any direct savings there, but we have saved a considerable amount of time which can be equated to a financial benefit."

As a result of the speedier return of the signed agency's GDPR compliant privacy policy, candidates can be sent off to meet prospective new employers more quickly.

Agenda Life Sciences has used Legalesign, a feature on their Voyager Infinity recruitment software, for nine months during which time it issued 437 agreements, an average of 50 per month. During this time 57.6% of agreements were signed within one day and only 1% of documents were rejected.

How it works. Legalesign & Voyager Infinity.

Judith added, "Legalesign is very simple to use, nobody has experienced difficulty using it. It is linked with the Voyager system so the signed agreements go directly on the candidates file there, eliminating the former process of cutting and pasting. It's very important for us to be compliant with GDPR which is our main use of Legalesign's electronic signature.

"The tracking system is very easy to follow too and with just a click of a button you can resend the form if it hasn't been signed. Legalesign is user-friendly and time saving and I certainly recommend it."
