

# SUSTAINABILITY

Here at Resorts World, sustainability is at the forefront of our minds, we are continuing to make changes and develop new initiatives to reach our sustainable goals. Whether we are looking at energy, waste or transport, we want to reduce our impact on the environment.

Sustainable development is a vital component to the future prosperity of our business and for the wider environment.

We recognise the opportunity that we have to create and implement positive environmental and social impacts. We are very aware of our responsibility and the risks associated of not taking these issues seriously.

We are committed to regular review and development of our policies and practices. We are committed to regular communication with our staff, tenants, neighbours and supply partners to ensure we maximize best practice and that we constantly strive to achieve our sustainability targets.

Like all businesses this is a work in progress but we would like to share with you some of the range of sustainable practices we implement across Resorts World.

We will update as we bring on further developments.

## WHAT WE ARE DOING RIGHT NOW

### ENERGY

- **Smart Meter Technology** - Installed throughout the building to monitor our energy consumption
- **LED Lighting** - The majority of our public and back of house areas have LED lighting and motion detectors fitted
- **Outside Lighting** - Our outside lighting is on daylight savings
- **Heat and Power** - We have a combined heat and power system
- **Spa, Steam Room and Sauna** - These are timed and therefore switched off out of hours

### WASTE

- **Landfill** - Our waste is 100% diverted from landfill
- **Waste to Energy Scheme** - We are part of the waste to energy scheme
- **Recycling** - Our waste is separated prior to collection to ensure we recycle as much as possible
- **Food Waste** - Our food waste is separated and sent to an anaerobic digestion plant to turn it into compost
- **Hazardous Waste** - Separated from general waste and collected separately to ensure harmful substances are not entered in to the waste chain

### WATER

- **Washroom Upgrade** - Our washrooms operate in low flush and sensor settings
- **Water Quality** - All restaurants have a grease trap to prevent cooking oils etc entering the drainage system

### BIODIVERSITY

- **Planting and Maintenance for Biodiversity** - We have planting all along the lakeside and have a green roof on level 3 of the building to increase biodiversity
- **Habitats and Refuges for Wildlife** - We have bird boxes, bat boxes and insect boxes fitted on the lakeside to provide a home for wildlife

### ECO-FRIENDLY PRODUCTS

- **Cleaning Products** - All cleaning products are eco-friendly and sourced from a single supplier, therefore, reducing our carbon footprint

### TRANSPORT

- **EV Charging Points** - We have 11 EV charging points in our car parks
- **Public Transport** - We are easily accessible by train, bus and car
