NEW! Localized Payment Capabilities for Authors in China

CCC is collaborating with China Educational Publications Import & Export Corporation (CEPIEC) to integrate their SocoPay payment system into RightsLink for Scientific Communications, the market-leading OA workflow solution.

Given the growing volume of Chinese research output and demand from China-based authors for a localized payment experience, RightsLink now enables authors in China with a payment experience tailored to their needs.

This integration enhances the billing and payment of publication charges that CCC collects on publishers' behalf from authors in China, meeting the increasing demand from authors to pay in local currency through common payment methods.

With the SocoPay integration, RightsLink publishers can:

- Improve the overall experience for China-based authors
- Introduce local mobile wallet options that authors in China often request, such as AliPay, WeChat, and UnionPay
- Extend author support with a local team that speaks Mandarin and English

Contact us today to see how RightsLink + SocoPay can support your Chinese authors.
