Partnering with you at each step of your publishing journey

STEP 1
Pre-Submission

Research Exchange Preprints simplifies the management and publication of early-stage research with automated conversion and metadata extraction for multiple content formats.

STEP 2
Submission

Research Exchange Submission enhances the author experience by automating submissions, reducing manual data entry, and accelerating publication decisions.

STEP 3
Screening

Research Exchange Screening's AI-powered papermill detection services and automated screening stops problematic papers from entering peer review.

STEP 4
Peer Review

Our Editorial and Peer Review Services expedite your research publishing outputs, from peer review management, editorial office support, and strategic advice pre- and post-production. While *Research Exchange* enables publishers to concentrate on improving the quality and speed of peer review.

STEP 5
Production

Our Production Services optimize your publishing operations by supporting your team with help on administrative tasks, improving workflows and ensuring consistent outputs across your entire portfolio. Our comprehensive book publishing solution covers everything you need from manuscript preparation and editorial support to production, marketing, and global distribution.

STEP 6
Content Discovery

The Atypon Experience Platform goes beyond hosting scholarly content. It delivers an unmatched experience for your audience and increases impact by making all content types easily accessible and discoverable.

STEP 7
Post-Publication

Our Revenue Diversification products and services help you to monetize your published content. Our sales teams optimize advertising, licensing, and market access, while our marketing experts enhance visibility and engagement. From direct sales management to custom solutions, we handle it all!

STEP 8
AI Channel

Wiley's AI Knowledge Nexus offers another way to diversify your revenue. This is our secure consolidated distribution framework for the AI era that our partners can use to receive fair compensation from AI developers training large language models using your content.

Research Exchange

Modernize your publishing ecosystem with our all-in-one platform for managing submissions and screening.

Optimize, scale, succeed

Revolutionize your publishing processes. Research Exchange fundamentally transforms traditional publishing workflows. Unlike legacy systems, Research Exchange is tailored for both users and publishers by enhancing the researcher experience and enabling publishers to concentrate on improving submission quality and promoting article growth.

SCALE AND OPTIMIZE WORKFLOWS

Accelerate your publishing processes with seamless integrations, editor-driven transfer services, and powerful dashboards.

PUBLISH WITH CONFIDENCE

Show your commitment to research integrity at scale, with enhanced, automated screening and assessment checks.

ENHANCE YOUR REPORTING

Leverage reliable and consistent data to make informed decisions and boost your journal portfolio's impact.
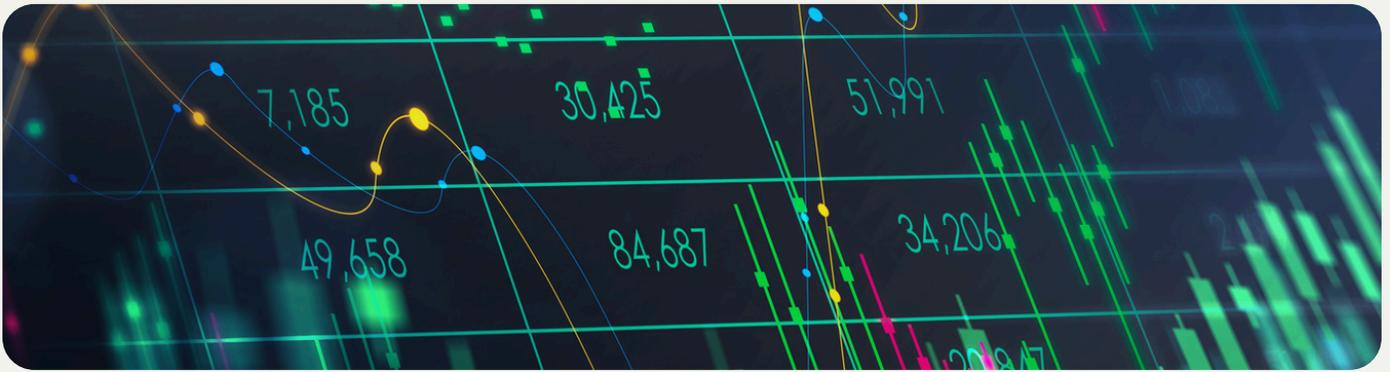

IMPROVE THE RESEARCHER EXPERIENCE

Provide a hassle-free experience that makes editorial operations more efficient and authors happier.

> " It was the most simple, straightforward, efficient submission that I've ever done in 20-plus years.
>
> — Dr. Neil Humphrey, The University of Manchester "

Research Exchange Submission

Empower faster submission, integrate with existing tools, improve the author experience, and gain better insights.

Elevate your publishing program

Research Exchange Submission is an innovative platform that enhances the author experience by automating submissions, reducing manual data entry, and accelerating publication decisions through advanced metadata extraction, while providing insights and facilitating the transfer of quality research to suitable journals.

EMPOWER FASTER SUBMISSION

Reduces the need for manual editorial checks due to automatic data extraction at submission.

INTEGRATE WITH EXISTING TOOLS

Integrate seamlessly with established third party peer-review systems, such as ScholarOne.

OPERATIONALIZE AND IMPROVE REPORTING

Improve qualitative metrics and reporting, streamline data feeds for marketing, and automate metadata extraction for articles.

IMPROVE THE RESEARCHER EXPERIENCE

Improve the researcher experience with end-to-end single system access, simplified processes, and a modern look and feel.

> "
> This new submission process is brilliant.
