

# Behringer MONOPOLY Firmware

## Version 1.0.8 (10 June 2021)

### Improvements:

1. Fixed issue: when sync with RD-8 TRIGGER OUTS in TRIG 1-PPS mode, if tempo is set to 100 BPM on RD-8, MONOPOLY will auto pause and restart alternately.
2. Added: "Last note ARP UP\_DOWN repeat mode" option, which will enable the user to choose the last note repeat (the same as original model) or not at ARP UP\_DOWN mode.
3. In ARP LATCH mode, when you press a new first key(s) again, the arpeggiator will restart from first octave now.
4. Add DIN and USB local control option.
