

In response to the current restrictions due to the pandemic of COVID-19, the Radiology Department continues to be a committed partner in the management of your patients. We have implemented many changes to keep our patients, families, and employees safe.

#### New Imaging Requests:

- All X-ray studies can still be performed on a walk-in basis without prior scheduling.
- All Fluoroscopy, Ultrasound, Nuclear Medicine, CT, and MRI appointments, when possible, are being scheduled after June 1, 2020. Studies requested prior to June 1, 2020 will not be scheduled by the Scheduling Center without review. Requests for these services will be transferred to a radiology staff member for triage. A radiologist will review the order and if appropriate, the appointment will be scheduled prior to June 1, 2020.
- **How you can help?** Help us in prioritizing needed studies from ones that can safely be deferred. Please indicate on the order if the imaging is needed for active care management of your patient prior to June 1, 2020.

#### Existing Imaging Appointments:

- All Fluoroscopy, Ultrasound, Nuclear Medicine, CT, and MRI scheduled appointments in May and June are currently being reviewed by a radiologist. If appropriate, we are rescheduling the patient for a later date to ensure we can maintain the safety protocols based on the most recent guidance from ODH and the Governor's Office.

#### Canceled Appointments:

- We are actively reviewing all cancellations and working to reschedule patients. Our radiologists are reviewing patients who were canceled and not yet rescheduled to prioritize patients who need care most.

Type of Imaging	Locations
MRI	Burnet Campus: No changes Liberty Campus: M-F 7a-6p (no anesthesia services until June 1) Kenwood: M-F 7a-5p (reopened 5/4/20) Green Township: MRI Department Closed
