

WOODWORKS

TEXTURES

TEXTURES

Woodworks believe that living with extra special woods matters. This is epitomized by the seasoned textures we create.

Each Woodworks texture is created to showcase the very best of the wood's features, bring movement to your surfaces, and connect your project to the natural world.

WORN AND RESTORED

Having faced the challenges of history, we fully restore the surface of our antique and reclaimed woods to emphasize their movement, patina and historical imperfections.

This surface encapsulates the origins of where Woodworks started, and represent the very best material the natural world has to offer.

UNDULATING

An organic surface that pays homage to the movement of centuries-old originals. We work the natural undulations by hand to help accentuate the beautiful shaping.

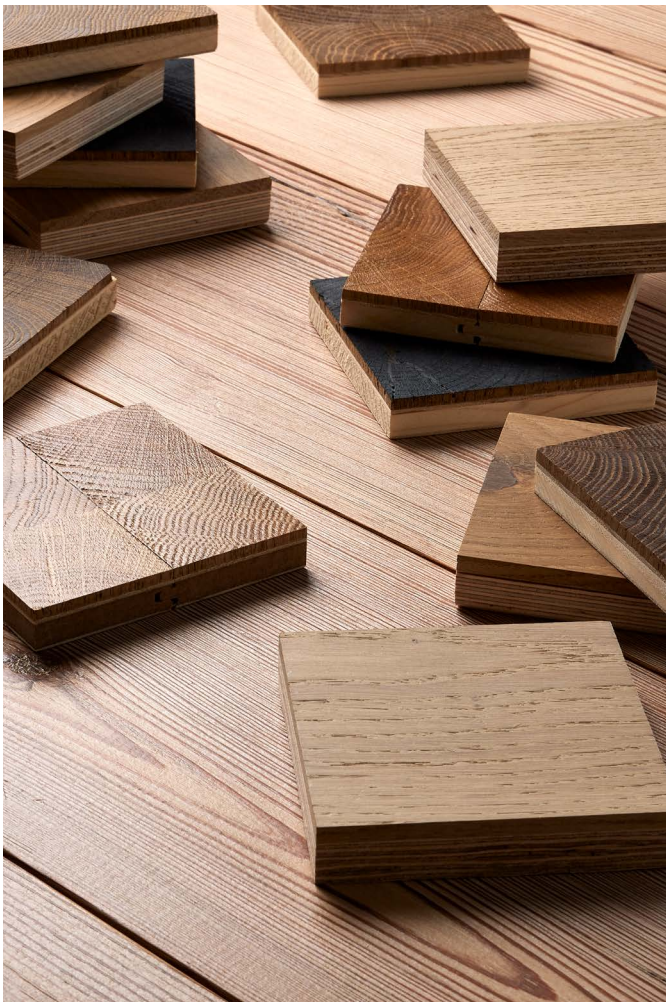

We consider this texture a key part of our Woodworks 'house style' and our artisans are experts in getting the very best out of this aspect.

SAWN

Inspired by the natural wear and tear of reclaimed wood, we add shallow and deep saw marks to the surface for a delicately rustic feel.

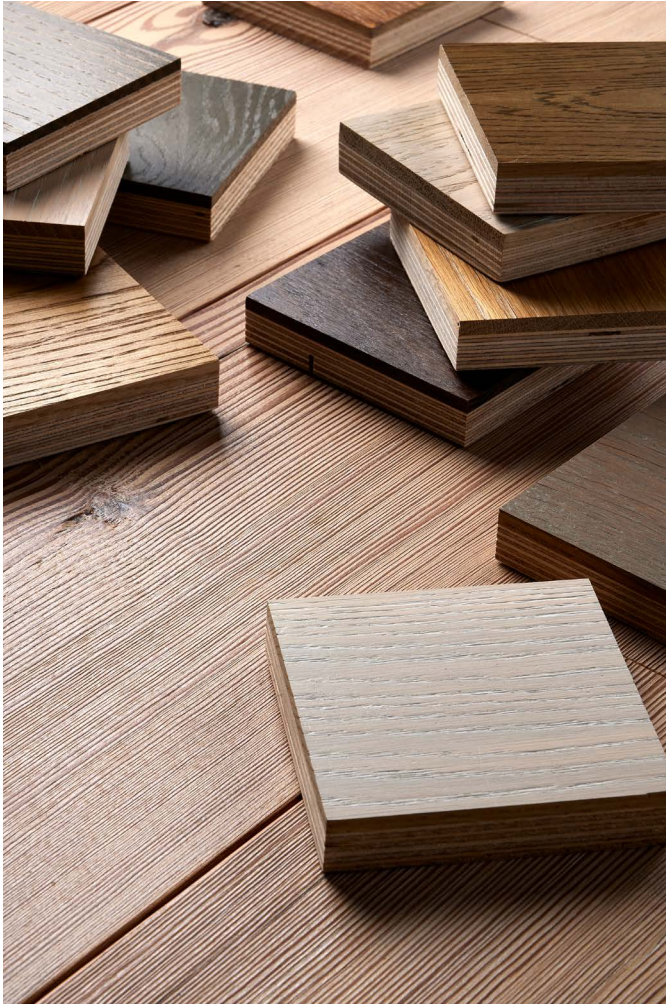

There are many varieties of sawn texture and we would recommend ordering a sample box of our these textures to compare and contrast through feeling.

LIGHTLY BRUSHED

Hand brushing is a careful and clever surface technique.

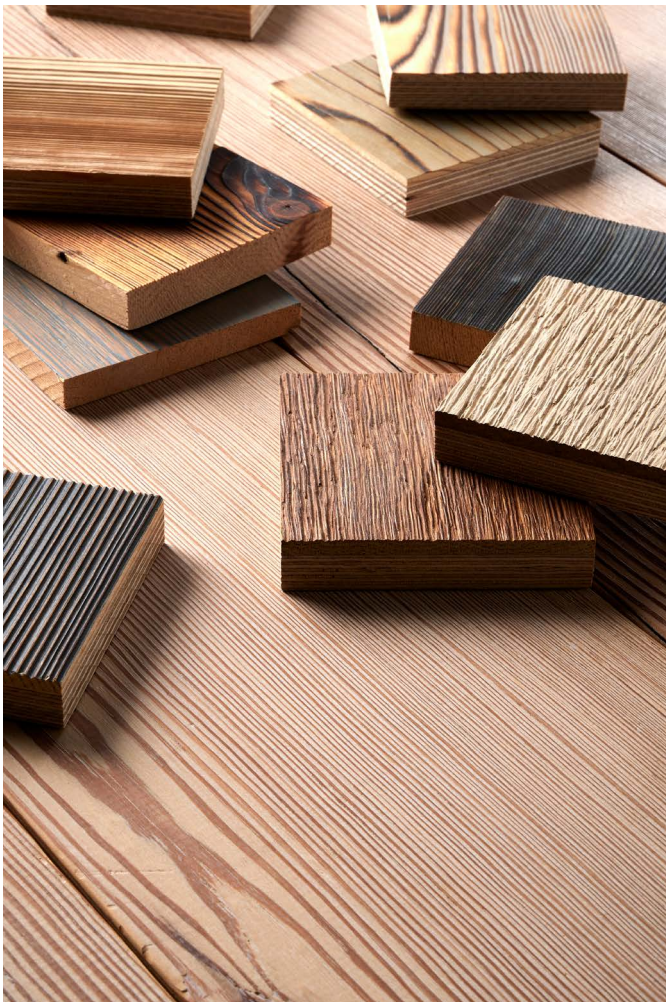

By using a variety of materials our artisans gently remove unwanted soft summer growth and reveal the natural beauty of the wood's grain patterns.

MEDIUM BRUSHED

A slightly heavier hand brushing that helps to reveal the natural grain patterns on the surface of the wood.

This provides a characterful and authentic look than lighter brushing techniques.

HEAVILY BRUSHED

Our heaviest hand brushing technique, showcasing intricate natural grain patterns, with added movement across the boards to match.

The heavier brushing creates more prominent grooves within the wood's texture, adding to the movement of the wood.

SMOOTH

Our artisans carefully hand-sand the surface of the wood over time in order to achieve a sleek, uniform look across the floor.

This texture embodies contemporary design practices and works particularly well with a square shoulder edge detail.

CREATORS OF THE EXTRAORDINARY

Woodworks are designers and creators of the finest antique, reclaimed
and new wood flooring.

Over the decades, we have honed our skills to restore woods formerly lost to the past,
mould surfaces that breathe and create textures that encapsulate history.

We do all of this, because we believe in living with special woods.
