

Adding pictures to your words

A picture frame beside a word in your own list means it has a picture.

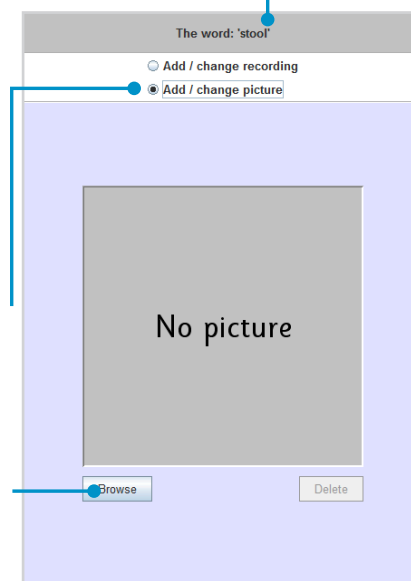

For example, the words in this list all have pictures except for the word 'stool'.

You can add/change these if you wish. You will not lose the pictures in the public lists by doing this.

Click on the word in your list and work from the panel on the right of the screen.

The word you have selected, in this case 'stool'

Select here to add or change a picture

Browse to find the picture you want to use

You can import pictures in many common formats including BMP, GIF, JPEG, PNG, TIFF.

Pictures are re-sized when added to your word list, but are best under 5Mb.

The picture will be saved automatically unless you choose to delete it (unlike recordings which you DO actively need to save).
