

Case study

Car Rental

European data centre migration and virtualisation

Xtravirt keeps the business running as data centres across Europe are consolidated and centralised

Challenge

- Reduce costs of running and supporting IT infrastructure
- Simplify requirements for European business initiatives and compliance standards
- Consolidate and migrate in-country systems to a purpose built facility
- Achieve targets within an aggressive timescale with minimal impact on daily business operations

Solution

- Well-documented understanding of infrastructure, applications and business processes
- Applied Xtravirt's Passport™ migration methodology
- Documented application landscape, business process impacts, users and interfaces
- Captured and assessed key environmental metrics to size the new target data centres

Result

- **Ten-fold improvement in server utilisation** enabling rapid provisioning of new services
- Network communications and connectivity of **network components improved**
- Licencing policy across new infrastructure consolidated, **reducing cost and compliance overhead**
- **Consolidated backup and archive solutions** replacing a mass of disparate systems and processes

Customer

Leading global provider of vehicle rental services, with more than 10,000 rental locations in approximately 175 countries.

Xtravirt is a leading, independent provider of enterprise virtualisation solutions. We deliver data centre, workspace and cloud transformational solutions to clients across public and private sectors, both in the UK and internationally.
