

Case study

Finance

Peace of mind assured for leading global financial services organisation as they blueprint their next generation VDI platform

Xtravirt develops a comprehensive and scalable framework to modernise, optimise, and increase security on key user systems

Challenge

- Enhance security and ensure core VMware® infrastructure complies with internal maintenance and governance
- De-risk the integration of a new Microsoft® security system within the VDI environment as part of a new operating system deployment
- Improve efficiency of customer's VMware converged data storage platform to reduce costs

Solution

- Comprehensive and repeatable testing framework developed and implemented, covering full range of functional capabilities – both new features and those used in the existing estate
- VMware vSAN™ storage testing, able to demonstrate measurable impact in performance and capacity when advanced optimisation features enabled
- VDI environment reconfigured to enable deployment of Windows 10 image with Microsoft Credential Guard integrated

Result

- **Validated solution of modernised VMware platform** enabled green light for release to production
- **Successful optimisation of VMware vSAN storage** improving both capacity and performance
- **Certified integration of higher security protection** enabling new Windows 10 solution rollout

Customer

This Global Financial Services organisation has offices in 42 countries worldwide and over 55,000 employees, with a range of B2C and B2B customers ranging from individuals to national governments.

Xtravirt is a leading, independent provider of enterprise virtualisation solutions. We deliver data centre, workspace and cloud transformational solutions to clients across public and private sectors, both in the UK and internationally.
