

Financial Accelerator for Digital Workspace

At a glance

A digital workspace is much more than a technology solution. It is transforming the way organisations of all sizes are enabling their workforces, while simplifying desktop and application management for IT administrators.

In many cases, the business benefits of app and desktop virtualisation alone go some way towards justifying the project costs, even before proving a long-term return on investment. However, despite the benefits in security, management, and flexibility, the historic acquisition costs of desktop and app virtualisation, may give organisations pause as they contemplate a go-forward strategy.

Xtravirt designs and builds strategies and solutions to solve complex IT challenges to unlock your full business and technology potential. If a digital workspace transformation is on your roadmap, then in most cases, financial analysis is a must.

Financial Accelerator for Digital Workspace is an output led engagement delivered by Xtravirt that provides the following:

- Financial analysis from experienced specialists, tailored to your environment. Leverage their experience to set the right digital workspace approach for your organisation and subsequent financial model
- Expert coaching through strategy and planning sessions that identifies which financial source areas require inclusion to calculate relevant cost of ownership and return on investment figures
- Documented findings captured directly from the sessions and subsequent calculations collated into a central information pack around digital workspace transformation costs, real world best practices, impacts and dependencies

Feature benefits

As experts in digital workspace transformation, Xtravirt deliver these key outcomes as part of the service:

- Business strategy definition, vision and challenges
- Technology solution alignment into; private cloud, hosted and managed hosted services, public cloud and SaaS environments
- Cost modelling to realise time to value, total cost of ownership and return on investment objectives

Activities and outcomes

Xtravirt's service delivers the following:

- Workshop sessions discussing organisation strategy requirements, constraints and financial objectives
- Capturing of digital workspace use cases and definition of a high-level solution approach and financial framework model
- Business analysis and financial source data gathering
- Toolset deployment to aid cost calculations
- Financial analysis focused on TCO and ROI
- Presentation of documented findings including next step options
